**See next page for the explanation for each agenda item for stockholders' approval.*

EXPLANATION OF AGENDA ITEMS FOR STOCKHOLDERS' APPROVAL

Approval of the Minutes of the Regular Stockholders' Meeting held on May 28, 2015

A copy of the draft Minutes of the 2015 Regular Stockholders' Meeting ("Minutes") will be available for examination during office hours at the Office of the Corporate Secretary located at the 7th Floor, SMC-Head Office Complex, No. 40 San Miguel Avenue, Mandaluyong City. Copies of the Minutes will also be made available for viewing at the registration area during the said meeting. The Minutes may also be accessed at the Company's website, <http://www.ginebrasanmiguel.com>.

Presentation of the Annual Report

A report will be presented to the stockholders on the performance of the Company in 2015, including the financial results and position of the Company, as well as the outlook for 2016. The Audited Consolidated Financial Statements of the Company as of December 31, 2015 forms part of the Information Statement that will be distributed to the stockholders entitled to vote during the 2016 Regular Stockholders' Meeting.

Ratification of Acts and Proceedings of the Board of Directors and Corporate Officers

Ratification by the stockholders will be obtained for all acts, resolutions and proceedings of the Board of Directors ("Board") and corporate officers of the Company since the Regular Stockholders' Meeting held on May 28, 2015 until May 26, 2016 as reflected in the minutes of the meetings of the Board of Directors, financial statements, reports, disclosures and records of the Company.

Election of Directors

The Nomination and Hearing Committee, pursuant to its Duties and Responsibilities as set forth in the Nomination and Hearing Committee Charter and the Company's Amended Manual on Corporate Governance (the "Manual") pre-screens and shortlists all candidates nominated to become a member of the Board, and determines if all the nominees have all the qualifications and none of the disqualifications set forth in the Company's Amended By-Laws, Manual and other applicable laws, rules and regulations, including the issuances of the SEC.

During the Nomination and Hearing Committee held on March 16, 2016, the Committee has determined that all nine (9) nominees are qualified for election as directors during the Regular Stockholders' Meeting. The profiles of the said nominees can be found in the Information Statement.

The nine (9) nominees will be presented for election to the Board by the stockholders.

Appointment of External Auditor

The Company's Audit Committee, pursuant to its Duties and Responsibilities as set forth in the Audit Committee Charter and the Manual, recommends to the Board the appointment of the Company's external auditor.

On March 16, 2016, the Audit Committee recommended to the Board the nomination of R.G. Manabat & Co. as the Company's external auditor for 2016. On the same date, the Board approved the said recommendation for approval of the stockholders.

Other Matters

Stockholders may propose to discuss and consider other relevant matters and concerns before the meeting adjourns.

Term of Office

Pursuant to the Company's Amended By-Laws, the directors are elected at each regular meeting of the stockholders by the stockholders entitled to vote. Unless he/she resigns, dies or is removed, each director holds office until the next annual election and until his/her successor is duly elected and qualified.

The nominees for election to the Board on May 26, 2016 are the following:

1. Eduardo M. Cojuangco, Jr.
2. Ramon S. Ang
3. Bernard D. Marquez
4. Francisco S. Alejo III
5. Leo S. Alvez
6. Gabriel S. Claudio
7. Mario K. Surio
8. Minita V. Chico-Nazario
9. Francisco H. Villaruz, Jr.

All nominations for the election of directors by the stockholders shall be submitted in writing to the Board through the Corporate Secretary on or before January 20 or at such earlier or later date that the Board may fix.

Under Section 3, Article II of the Company's Amended By-Laws, (i) any stockholder having at least five thousand (5,000) shares registered in his/her/its name may be elected Director, and (ii) a person engaged in any business which competes with or is antagonistic to that of the Company as defined in Section 3, Article II of the Company's Amended By-Laws, is not qualified or eligible for nomination or election to the Board.

The Nomination and Hearing Committee, pursuant to its Duties and Responsibilities as set forth in the Nomination and Hearing Committee Charter and the Company's Amended Manual on Corporate Governance (the "Manual") pre-screens and shortlists all candidates nominated to become a member of the Board, and determines if all the nominees have all the qualifications and none of the disqualifications set forth in the Company's Amended By-Laws, Manual and other applicable laws, circulars, rules and regulations, including the issuances of the SEC.

During the Nomination and Hearing Committee held on March 16, 2016, the Committee has determined that all nine (9) nominees are qualified for election as directors during the Regular Stockholders' Meeting.

Independent Directors

The Company has two (2) Independent Directors who, apart from their fees and shareholdings, have no business or relationship with the Company, which could or could reasonably be perceived to materially interfere with the exercise of their independent judgment in carrying out their responsibilities as directors. The incumbent Independent Directors of the Company, who are also nominated for re-election on May 26, 2016, are the following:

Nominee for Independent Director (a)	Person/Group recommending nomination (b)	Relation of (a) and (b)
Minita V. Chico-Nazario	Ramon S. Ang	None
Francisco H. Villaruz, Jr.	Ramon S. Ang	None

In approving the nominations for Independent Directors, the Nomination and Hearing Committee took into consideration the guidelines on the nomination of Independent Directors prescribed in Rule 38 of the Securities Regulation Code ("SRC"), its Implementing Rules and Regulations, as well as applicable issuances of the Securities and Exchange Commission ("SEC").

The foregoing directors have certified that they possess all the qualifications and none of the disqualifications provided for in the SRC. The respective current Certificates of Qualification (Certificates) of the said directors are attached hereto as Annexes "A-1" and "A-2", respectively. Within thirty (30) days from re-election, the said directors will submit anew their respective Certificates.

Significant Employees

The Company has no employee who is not an executive officer but who is expected to make a significant contribution to the business.

Family Relationships

There are no family relationships up to the fourth civil degree either by consanguinity or affinity among the directors, executive officers, or nominees for election as directors.

Certain Relationships and Related Transactions

There were no transactions with directors, officers or any principal stockholders (owning at least 10% of the total outstanding shares of the Company) not in the ordinary course of business. The Company observes an arm's length policy in its dealings with related parties.

Parent Company

As of March 31, 2016, San Miguel Corporation owns 78.27% of the shares of the Company.

Involvement in Certain Legal Proceedings

None of the directors, nominees for election as director, executive officers or control persons of the Company have been involved in the following legal proceedings, including being the subject of any (a) bankruptcy petition, (b) conviction by final judgment in a criminal proceeding, domestic or foreign, excluding traffic violations and other minor offenses, (c) order, judgment or decree of any court of competent jurisdiction, domestic or

foreign, permanently or temporarily enjoining, barring, suspending or otherwise limiting his/her involvement in any type of business, securities, commodities or banking activities, which is not subsequently reversed, suspended or vacated, or (d) judgment of violation of a securities or commodities law or regulation by a domestic or foreign court of competent jurisdiction (in a civil action), the SEC or comparable foreign body, or a domestic or foreign exchange or other organized trading market or self-regulatory organization, which has not been reversed, suspended or vacated, for the past five (5) years up to the latest date that is material to the evaluation of his/her ability or integrity to hold the relevant position in the Company.

COMPENSATION OF DIRECTORS AND EXECUTIVE OFFICERS

The following table summarizes the aggregate compensation paid or incurred during the last two (2) fiscal years and estimated to be paid in the ensuing fiscal year to the Company's President and senior executive officers:

Article II, Section 9 of the Amended By-Laws of the Company provides that the members of the Board shall receive such compensation as may be approved by a majority vote of the stockholders at a regular or special meeting duly called, subject to such limitations as may be imposed by law.

In 2015, each director received a per diem of Ten Thousand Pesos (P10,000.00) per attendance at Board and Board Committee meetings of the Company. There were five (5)

⁵ The President and senior officers of the Company from 2014 to 2015 are the following: Bernard D. Marquez, Clemente O. Alburo (retired from the Company effective at the close of business hours of December 31, 2015 as disclosed by the Company through SEC Form 17-C filed on January 12, 2016), Rosalina A. Lioanag, Cynthia M. Baroy and Nelson S. Elises. For 2016, the President and senior officers of the Company are the same as previous years, except for the exclusion of Mr. Alburo and inclusion of Mr. Emmanuel B. Macalalag. Mr. Eduardo M. Cojuangco, Jr., the Chairman and Chief Executive Officer of the Company does not receive compensation from the Company other than the per diem for attendance in Board and Board Committee meetings.

Board, four (4) Audit Committee and one (1) Nomination and Hearing Committee meetings that were held in 2015.

There were no other arrangements pursuant to which any of the directors was compensated or is to be compensated, directly or indirectly, during the last fiscal year, and the ensuing fiscal year.

The named executive officers of the Company, just like other full-time and permanent employees of the Company, subject to certain requirements,⁶ are eligible to subscribe to Company shares under the Company's Employees Stock Purchase Plan (the "Plan"). As of December 31, 2015, the current named officers have an aggregate subscription of 158,000 shares under the Plan.

The Plan was intended primarily to promote a sense of ownership and greater work commitment among employees of the Company and its subsidiaries. Three Million (3,000,000) shares from the Company's authorized and unissued shares were reserved for the Plan. The subscription price per share under the Plan is equal to the weighted average market closing prices of the last quarter immediately preceding the application/subscription period, less a discount of fifteen percent (15%). The shares covered by the Plan are no longer available for subscription as the offering period provided under the Plan expired on January 21, 2013.

There were no employment contracts between the Company and a named executive officer.

There were neither compensatory plans nor arrangements with respect to a named executive officer.

Liquor Business

The Company was formed on July 10, 1987 as the legal entity for the acquisition by SMC of the production assets of an existing liquor production company that had been in operation since 1902. Today, the Company operates three (3) liquor bottling facilities located in the following areas: (1) Mandaue City, Cebu; (2) Sta. Barbara, Pangasinan; and (3) Cabuyao, Laguna.

Among its subsidiaries are (1) Distileria Bago, Inc. ("DBI"), an entity with a distillery located in Bago City, Negros Occidental, that converts sugar cane molasses into alcohol, which entity became a wholly-owned subsidiary of the Company in 1996; and (2) Agricrops Industries, Inc. ("Agricrops"), which was incorporated in 2000 as a wholly-owned subsidiary of GSMI to primarily engage in the production of cassava starch milk, an alternative raw material for the production of alcohol. On August 14, 2009, both DBI and Agricrops amended their respective Articles of Incorporation to expand their respective primary purposes. For DBI, its primary purpose now includes the manufacture, production and tolling of not only distilled alcohol but also other kinds of alcohol and the by-product of the said kinds of alcohol. For Agricrops, its primary purpose now includes farming and medicinal preparations such as ethyl rubbing alcohol as well as manufacturing of organic fertilizer from various agro-industrial wastes. As of December 31, 2015, Agricrops has not yet started commercial operations.

To fast-track entry into regional markets, the Company in November 2004 entered into a Share Purchase Agreement ("SPA") with the Thai Life Group of Companies ("Thai Life") for the purchase of 40% ownership of the outstanding shares of C.N.T. Wine and Liquor Company Limited ("CNT"), a limited company organized under the laws of Thailand. CNT possesses a license in Thailand to engage in the business of manufacturing alcohol and manufacturing, selling and distributing brandy, wine and distilled spirits products both for domestic and export markets. Also, on the same date, the Company and Thai Life entered into a Joint Venture Agreement ("JVA"). The JVA established the terms and conditions regarding the ownership and operation of CNT and the joint control rights, obligations and responsibilities of the Company and Thai Life, as stockholders. In November 2004, the Company incorporated Ginebra San Miguel International Limited ("GSMIL") and subsequently assigned its rights and obligations under the SPA and the JVA to GSMIL, including its rights to purchase 40% ownership of the outstanding shares of CNT. The acquisition of CNT was completed in December of the same year. CNT was later renamed Thai San Miguel Liquor Co., Ltd. ("TSML").

On June 29, 2007, the Company incorporated GSM International Holdings Ltd. ("GSMIHL"), a wholly-owned subsidiary in Thailand. GSMIHL holds 40% of the shares of Thai Ginebra Trading Co., Ltd. ("TGT"), another joint venture company formed with Thai Life. TGT functions as the selling and distribution arm of TSML.

On August 27, 2008 and September 11, 2008, the Company incorporated Global Beverage Holdings Limited ("GBHL") and Siam Holdings Limited ("SHL"), respectively, as its wholly-owned subsidiaries, respectively. Both are entities established as holding companies for the acquisition of additional investment in TSML and TGT.

On October 14, 2008, SHL acquired 49% ownership of the outstanding shares of Siam Wine and Liquor Ltd. ("SWL"), a limited company organized under the laws of Thailand. On the same date, SWL acquired 10% ownership of the outstanding capital stock of TSML and TGT. Accordingly, the share in TSML and TGT of the Company and its subsidiaries was increased from 40% to 44.9%.

On January 27, 2012, the Company purchased 100% of the total outstanding shares of East Pacific Star Bottlers Phils Inc. ("EPSBPI"), a corporation principally engaged in the toll-manufacture and bottling of alcoholic and non-alcoholic beverages. The acquisition forged synergies with the Company's on-going operations and provided additional capacity for the contemplated expansion plans of the Company. EPSBPI owns bottling facilities in Cauayan, Isabela and in Ligao City, Albay, which are currently being used principally in connection with the Company's liquor business.

In August 2015, the Company sold certain properties located in Calumpit, Bulacan and Tagoloan, Misamis Oriental. The Company recognized gain included as part of "Gain on sale of property and equipment" account in the 2015 consolidated statements of income.

Non-Liquor Business

On January 31, 2008, Healthy Condiments, Inc. ("HCI") was incorporated as a wholly-owned subsidiary of the Company. HCI was established to manufacture, sell, distribute, import and export vinegar and other sauce products and condiments. On March 27, 2009, the Board and stockholders of HCI approved the transfer of all its assets, properties, business, permits and licenses to the Company. On April 16, 2009, HCI and the Company executed an Asset Purchase Agreement ("APA") for the sale of the former's assets consisting of receivables and inventories as of February 28, 2009, including the trademark "Supremo" (collectively referred to as "Condiments Assets"). On May 31, 2009, the closing of the purchase and sale of Condiments Assets took place for a total consideration of P15 million, which is equivalent to the book value of the assets sold. HCI is commercially inactive at present.

On November 1, 2008, the Company entered into an Asset Purchase Agreement with San Miguel Beverages, Inc. ("SMBI") for the purchase of SMBI's assets consisting of receivables, equipment, containers and inventories. SMBI is engaged in the manufacture and distribution of non-alcoholic beverages. With the acquisition of SMBI assets, the Company ventured into the manufacturing and distribution of non-alcoholic beverages thru toll manufacturing agreements with third parties to produce its products in Valenzuela, Bulacan, Pampanga, Laguna, Rizal, Las Piñas, Cebu and Davao.

On December 5, 2014, the Company's Board authorized the sale and transfer to SMB of certain non-alcoholic beverage assets consisting of property, plant and equipment as of December 31, 2014, and inventories as of March 31, 2015 (the "Transaction") and delegated to Management the negotiation and conclusion of the terms and conditions of the Transaction. The sale of property, plant and equipment was completed on April 1, 2015 while the sale of the finished goods and other inventories was consummated on April 30, 2015.

Independent Public Accountants

R.G. Manabat & Co. (formerly Manabat Sanagustin & Co., CPAs) has been the Company's external auditor since 2006. Compliant with Part I (3) (b) (ix) of SRC Rule 68, as amended, with respect to the re-engagement of the said audit firm, the Company consistently observes the rule on rotation for the signing partner every after five (5) years.

Fees for the services rendered by the external auditor to the Company and its subsidiaries in connection with the Company's annual financial statements and other statutory and regulatory filings for 2015 and 2014 (inclusive of retainer fees and out-of-pocket expenses) amounted to about P 7 million per year.

The Company's Audit Committee, pursuant to its Duties and Responsibilities as set forth in the Audit Committee Charter and the Company's Manual, recommends to the Board the appointment of the Company's external auditor. The Audit Committee reviews the terms of engagement and scope of services of the external auditor and endorses the same for the approval of the Board of Directors and ensures that audit services rendered shall not impair or derogate the independence of the external auditor or violate SEC regulations.

On March 16, 2016, the Audit Committee recommended to the Board the nomination of R.G. Manabat & Co. as the Company's external auditor for 2016. On the same date, the Board approved the said recommendation for approval of the stockholders during the Regular Stockholders' Meeting on May 26, 2016. The representatives of the said audit firm are expected to be present during the said meeting and will be available to respond to appropriate questions, if necessary. They will also have the opportunity to make a statement, if they so desire.

Compliance with leading practice on Corporate Governance

Recognizing that good governance plays a vital role in creating and sustaining shareholder value, the Company on August 6, 2002, institutionalized the principles of good corporate governance in the entire organization by establishing and implementing the Manual.

On March 30, 2010, the Board amended the Manual in compliance with the Revised Code of Corporate Governance issued by SEC under its Memorandum Circular No. 6, Series of 2009. The Manual has been consistently updated in order to make the provisions thereof current and consistent with the issuances, circulars, rules and regulations of SEC. In 2014, the Company amended the Manual twice in order to align the provisions thereof with the recent circulars issued by the SEC.

To aid the Board in complying with the principles of good corporate governance, the Board constituted four (4) committees, namely: 1) Executive Committee; 2) Nomination and Hearing Committee; 3) Executive Compensation Committee; and 4) Audit Committee. In order to further clarify and expound on the role, authority, duties and responsibilities of the Board Committees, each of the Committees, with the exception of the Executive Committee, approved and adopted their respective charters. The Audit Committee Charter was approved on November 9, 2012 while the respective Charters of the Nomination and Hearing Committee and Executive Compensation Committee, were approved on November 7, 2013.

The Board has implemented an annual internal self-rating system since its adoption on November 8, 2011, in order to assess and improve the performance of the Board in accordance with the best practices in corporate governance and the effectiveness of the Company's governance process. The said system covers four (4) broad areas of Board performance, namely: Fulfillment of the Board's Key Responsibilities, Board – Management Relationship, Effectiveness of Board Processes and Meetings and Individual Performance of Board Members.

The Audit Committee has also implemented an annual internal self-rating system since its adoption on August 6, 2015 in order to assess compliance of the Committee with its Charter, as well as improve the performance of the Committee in accordance with the best practices in corporate governance and the effectiveness of the Company's governance process. The said system covers six (6) broad areas of Committee performance, namely: Structure, Operation and Reporting Process; Oversight on Financial Statements and Financial Reporting; Oversight on Internal Controls and Risk Management; Oversight on External Audit; Oversight on Internal Audit; and Compliance with Legal and Regulatory Requirements.

Committed to good corporate governance practice and to keep themselves updated on the relevant laws, rules, regulations, circulars and issuances of regulatory bodies, all incumbent directors, senior executive officers and internal audit head attended a Corporate Governance Seminar conducted by a SEC-accredited provider, Risks, Opportunities, Assessment and Management, Inc., held on various dates: September 24, October 20, November 11 and December 4, 2015 at the SMC-Head Office Complex located at No. 40 San Miguel Avenue, Mandaluyong City.

CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2015, 2014 and 2013

**STATEMENT OF MANAGEMENT'S RESPONSIBILITY
FOR CONSOLIDATED FINANCIAL STATEMENTS**

The management of Ginebra San Miguel Inc. (the "Company") is responsible for the preparation and fair presentation of the consolidated financial statements for the years ended December 31, 2015, 2014 and 2013, including the additional components attached therein, in accordance with the prescribed financial reporting framework indicated therein. This responsibility includes designing and implementing internal controls relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error, selecting and applying appropriate accounting policies, and making accounting estimates that are reasonable in the circumstances.

The Board of Directors reviews and approves the consolidated financial statements and submits the same to the stockholders of the Company.

R.G. Manabat & Co., the independent auditors appointed by the stockholders, has audited the consolidated financial statements of the Company in accordance with Philippine Standards on Auditing, and in its report to the stockholders has expressed its opinion on the fairness of presentation upon completion of such audit.

REPORT OF INDEPENDENT AUDITORS

The Board of Directors and Stockholders
Ginebra San Miguel Inc.
3rd and 6th Floor, San Miguel Properties Centre
St. Francis Street, Ortigas Center
Mandaluyong City

Report on the Financial Statements

We have audited the accompanying consolidated financial statements of Ginebra San Miguel Inc. and Subsidiaries which comprise the consolidated statements of financial position as at December 31, 2015 and 2014, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for each of the three years in the period ended December 31, 2015, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Philippine Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Philippine Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Ginebra San Miguel Inc. and Subsidiaries as at December 31, 2015 and 2014, and its financial performance and its cash flows for each of the three years in the period ended December 31, 2015, in accordance with Philippine Financial Reporting Standards.

GINEBRA SAN MIGUEL INC. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in Thousands, Except Percentages, Per Share Data and Number of Shares)

1. Reporting Entity

Ginebra San Miguel Inc. (GSMI or the Company), a subsidiary of San Miguel Corporation (SMC or the Parent Company), was incorporated in the Philippines on July 10, 1987. Top Frontier Investment Holdings, Inc. (Top Frontier) is the ultimate parent company of the Group.

The accompanying consolidated financial statements comprise the financial statements of the Company and its Subsidiaries (collectively referred to as the “Group”) and the Group’s interests in joint ventures.

The Company is a public company under Section 17.2 of the Securities Regulation Code and its shares are listed on The Philippine Stock Exchange, Inc.

The Group is primarily engaged in manufacturing and selling of alcoholic and nonalcoholic beverages (NAB).

In 2015, the Group sold its NAB business to San Miguel Brewery Inc. (SMB) (Note 6).

The registered office address of the Company is 3rd and 6th Floor, San Miguel Properties Centre, St. Francis Street, Ortigas Center, Mandaluyong City.

2. Basis of Preparation

Statement of Compliance

The accompanying consolidated financial statements have been prepared in compliance with Philippine Financial Reporting Standards (PFRS). PFRS are based on International Financial Reporting Standards issued by the International Accounting Standards Board. PFRS consist of PFRS, Philippine Accounting Standards (PAS) and Philippine Interpretations issued by the Financial Reporting Standards Council (FRSC).

The consolidated financial statements were approved and authorized for issue in accordance with a resolution by the Board of Directors (BOD) on March 16, 2016.

Basis of Measurement

The consolidated financial statements of the Group have been prepared on a historical cost basis of accounting except for the following items which are measured on an alternative basis at each reporting date:

Items	Measurement Basis
Derivative financial instruments	Fair value
Defined benefit retirement asset (liability)	Fair value of the plan assets less the present value of the defined benefit retirement obligation

Functional and Presentation Currency

The consolidated financial statements are presented in Philippine peso, which is the Company's functional currency. All financial information are rounded off to the nearest thousand (000), except when otherwise indicated.

Basis of Consolidation

The consolidated financial statements include the accounts of the Company and the following wholly-owned subsidiaries:

Name of Subsidiary	Country of Incorporation
Distileria Bago, Inc. (DBI)	Philippines
East Pacific Star Bottlers Phils Inc. (EPSBPI)	Philippines
Agricrops Industries, Inc. (AII)	Philippines
Healthy Condiments, Inc. (HCI)	Philippines
Ginebra San Miguel International Ltd. (GSMIL)	British Virgin Islands (BVI)
GSM International Holdings Ltd. (GSMIHL)	BVI
Global Beverage Holdings Ltd. (GBHL)	BVI
Siam Holdings Ltd. (SHL)	BVI

A subsidiary is an entity controlled by the Group. The Group controls an entity if, and only if, the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

When the Group has less than majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including the contractual arrangement with the other vote holders of the investee, rights arising from other contractual arrangements and the Group's voting rights and potential voting rights.

The financial statements of the subsidiaries are included in the consolidated financial statements from the date when the Group obtains control, and continue to be consolidated until the date when such control ceases.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using uniform accounting policies for like transactions and other events in similar circumstances. Intergroup balances and transactions, including intergroup unrealized profits and losses, are eliminated in preparing the consolidated financial statements.

A change in the ownership interest in a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, the Group: (i) derecognizes the assets (including goodwill) and liabilities of the subsidiary, and the cumulative transaction differences recorded in equity; (ii) recognizes the fair value of the consideration received, the fair value of any investment retained and any surplus or deficit in the consolidated statements of income; and (iii) reclassify the Company's share of components previously recognized in other comprehensive income to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

3. Significant Accounting Policies

The accounting policies set out below have been applied consistently to all periods presented in the consolidated financial statements, except for the changes in accounting policies as explained below.

Adoption of New and Amended Standards and Interpretation

The FRSC approved the adoption of a number of new and amended standards and interpretation as part of PFRS.

Amendments to Standards and Interpretation Adopted in 2015

The Group has adopted the following PFRS effective January 1, 2015 and accordingly, changed its accounting policies in the following areas:

- *Annual Improvements to PFRS Cycles 2010-2012 and 2011-2013* contain 11 changes to nine standards with consequential amendments to other standards and interpretations, of which only the following are applicable to the Group:
 - Meaning of ‘Vesting Condition’ (*Amendment to PFRS 2, Share-based Payment*). PFRS 2 has been amended to clarify the definition of ‘vesting condition’ by separately defining ‘performance condition’ and ‘service condition’. The amendment also clarifies the following: (i) how to distinguish between a market and a non-market performance condition; and (ii) the basis on which a performance condition can be differentiated from a non-vesting condition. The adoption of the amendment did not have an effect on the consolidated financial statements.
 - Scope Exclusion for the Formation of Joint Arrangements (*Amendment to PFRS 3, Business Combinations*). PFRS 3 has been amended to clarify that the standard does not apply to the accounting for the formation of all types of joint arrangements in PFRS 11, *Joint Arrangements* - i.e., including joint operations - in the financial statements of the joint arrangements themselves. The adoption of the amendment did not have an effect on the consolidated financial statements.
 - Disclosures on the Aggregation of Operating Segments (*Amendments to PFRS 8, Operating Segments*). PFRS 8 has been amended to explicitly require the disclosure of judgments made by management in applying the aggregation criteria. The disclosures include: (i) a brief description of the operating segments that have been aggregated; and (ii) the economic indicators that have been assessed in determining that the operating segments share similar economic characteristics. In addition, the amendments clarify that a reconciliation of the total of the reportable segments’ assets to the entity’s assets is required only if this information is regularly provided to the entity’s chief operating decision maker. This change aligns the disclosure requirements with those for segment liabilities. The adoption of the amendments did not have an effect on the consolidated financial statements.

- Scope of Portfolio Exception (*Amendment to PFRS 13, Fair Value Measurement*). The amendment clarifies that the scope of the exception for measuring the fair value of a group of financial assets and financial liabilities with offsetting risk positions on a net basis (portfolio exception) applies to contracts within the scope of PAS 39, *Financial Instruments: Recognition and Measurement* and PFRS 9, *Financial Instruments*, regardless of whether they meet the definition of financial assets or financial liabilities under PAS 32, *Financial Instruments: Presentation* - e.g., certain contracts to buy or sell non-financial items that can be settled net in cash or another financial instrument. The adoption of the amendment did not have an effect on the consolidated financial statements.
- Definition of 'Related Party' (*Amendments to PAS 24, Related Party Disclosures*). The definition of a 'related party' is extended to include a management entity that provides key management personnel (KMP) services to the reporting entity, either directly or through a group entity. For related party transactions that arise when KMP services are provided to a reporting entity, the reporting entity is required to separately disclose the amounts that it has recognized as an expense for those services that are provided by a management entity; however, it is not required to 'look through' the management entity and disclose compensation paid by the management entity to the individuals providing KMP services. The reporting entity will also need to disclose other transactions with the management entity under the existing disclosure requirements of PAS 24 - e.g., loans. The adoption of the amendments did not have an effect on the consolidated financial statements.
- Classification and Measurement of Contingent Consideration (*Amendments to PFRS 3*). The amendments clarify the classification and measurement of contingent consideration in a business combination. When contingent consideration is a financial instrument, its classification as a liability or equity is determined by reference to PAS 32, rather than to any other PFRS. Contingent consideration that is classified as an asset or a liability is always subsequently measured at fair value, with changes in fair value recognized in the consolidated statements of income. Consequential amendments are also made to PAS 39 and PFRS 9 to prohibit contingent consideration from subsequently being measured at amortized cost. In addition, PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, is amended to exclude provisions related to contingent consideration. The adoption of the amendments did not have an effect on the consolidated financial statements.

Additional disclosures required by the amended standards were included in the consolidated financial statements, where applicable.

New and Amended Standards and Interpretation Not Yet Adopted

A number of new and amended standards and interpretation are effective for annual periods beginning after January 1, 2015 and have not been applied in preparing these consolidated financial statements. Unless otherwise indicated, none of these is expected to have a significant effect on the consolidated financial statements.

The Group will adopt the following new and amended standards and interpretation on the respective effective dates:

- Disclosure Initiative (*Amendments to PAS 1, Presentation of Financial Statements*). The amendments clarify the following: (i) the materiality requirements in PAS 1; (ii) that specific line items in the consolidated statements of income, consolidated statements of comprehensive income and the consolidated statements of financial position may be disaggregated; (iii) that entities have flexibility as to the order in which they present the notes to the consolidated financial statements; and (iv) that share of other comprehensive income of associates and joint ventures accounted for using the equity method must be presented in aggregate as a single line item, and classified between those items that will or will not be subsequently reclassified to profit or loss. Furthermore, the amendments clarify the requirements that apply when additional subtotals are presented in the consolidated statements of financial position, the consolidated statements of income and consolidated statements of comprehensive income. The amendments are required to be applied for annual periods beginning on or after January 1, 2016. Early adoption is permitted.
- Accounting for Acquisitions of Interests in Joint Operations (*Amendments to PFRS 11*). The amendments require business combination accounting to be applied to acquisitions of interests in a joint operation that constitutes a business. Business combination accounting also applies to the acquisition of additional interests in a joint operation while the joint operator retains joint control. The additional interest acquired will be measured at fair value. The previously held interests in the joint operation will not be remeasured. The amendments place the focus firmly on the definition of a business, because this is key to determining whether the acquisition is accounted for as a business combination or as the acquisition of a collection of assets. As a result, this places pressure on the judgment applied in making this determination. The amendments are required to be applied prospectively for annual periods beginning on or after January 1, 2016. Early adoption is permitted.
- Clarification of Acceptable Methods of Depreciation and Amortization (*Amendments to PAS 16, Property, Plant and Equipment and PAS 38, Intangible Assets*). The amendments to PAS 38 introduce a rebuttable presumption that the use of revenue-based amortization methods for intangible assets is inappropriate. This presumption can be overcome only when revenue and the consumption of the economic benefits of the intangible asset are highly correlated, or when the intangible asset is expressed as a measure of revenue. The amendments to PAS 16 explicitly state that revenue-based methods of depreciation cannot be used for property, plant and equipment. This is because such methods reflect factors other than the consumption of economic benefits embodied in the asset - e.g., changes in sales volumes and prices. The amendments are required to be applied prospectively for annual periods beginning on or after January 1, 2016. Early application is permitted.
- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (*Amendments to PFRS 10, Consolidated Financial Statements and PAS 28, Investments in Associates*). The amendments address an inconsistency in the requirements in PFRS 10 and PAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The amendments require that a full gain or loss is recognized when a transaction involves a business whether it is housed in a subsidiary or not. A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary. The amendments are required to be applied prospectively for annual periods beginning on or after January 1, 2016. Early adoption is permitted.

- *Annual Improvements to PFRS Cycles 2012-2014* contain changes to four standards, of which only the *Changes in Method for Disposal (Amendments to PFRS 5, Noncurrent Assets Held for Sale and Discontinued Operations)* is applicable to the Group. PFRS 5 is amended to clarify that: (a) if an entity changes the method of disposal of an asset or disposal group - i.e., reclassifies an asset or disposal group from held-for-distribution to owners to held-for-sale, or vice versa, without any time lag - the change in classification is considered a continuation of the original plan of disposal and the entity continues to apply held-for-distribution or held-for-sale accounting. At the time of the change in method, the entity measures the carrying amount of the asset or disposal group and recognizes any write-down (impairment loss) or subsequent increase in the fair value of the asset or disposal group, less costs to sell or distribute; and (b) if an entity determines that an asset or disposal group no longer meets the criteria to be classified as held-for-distribution, then it ceases held-for-distribution accounting in the same way as it would cease held-for-sale accounting. Any change in method of disposal or distribution does not, in itself, extend the period in which a sale has to be completed. The amendments to PFRS 5 are applied prospectively in accordance with PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*, to changes in methods of disposal that occur on or after January 1, 2016.

- PFRS 9 (2014) replaces PAS 39 and supersedes the previously published versions of PFRS 9 that introduced new classifications and measurement requirements (in 2009 and 2010) and a new hedge accounting model (in 2013). PFRS 9 includes revised guidance on the classification and measurement of financial assets, including a new expected credit loss model for calculating impairment of all financial assets that are not measured at fair value through profit or loss (FVPL), which generally depends on whether there has been a significant increase in credit risk since initial recognition of a financial asset, and supplements the new general hedge accounting requirements published in 2013. The new model on hedge accounting requirements provides significant improvements by aligning hedge accounting more closely with risk management. The new standard is required to be applied retrospectively for annual periods beginning on or after January 1, 2018. Early adoption is permitted.

- PFRS 16, *Leases* supersedes PAS 17, *Leases* and the related Philippine Interpretations. The new standard introduces a single lease accounting model for lessees under which all major leases are recognized on-balance sheet, removing the lease classification test. Lease accounting for lessors essentially remains unchanged except for a number of details including the application of the new lease definition, new sale-and-leaseback guidance, new sub-lease guidance and new disclosure requirements. Practical expedients and targeted reliefs were introduced including an optional lessee exemption for short-term leases (leases with a term of 12 months or less) and low-value items, as well as the permission of portfolio-level accounting instead of applying the requirements to individual leases. New estimates and judgmental thresholds that affect the identification, classification and measurement of lease transactions, as well as requirements to reassess certain key estimates and judgments at each reporting date were introduced. PFRS 16 is effective for annual periods beginning on or after January 1, 2019. Earlier application is not permitted until the FRSC has adopted PFRS 15. The Group is currently assessing the potential impact of PFRS 16 and plans to adopt this new standard on leases on the required effective date once adopted locally.

- IFRS 15, *Revenue from Contracts with Customers* replaces PAS 11, *Construction Contracts*, PAS 18, *Revenue*, IFRIC 13, *Customer Loyalty Programmes*, IFRIC 18, *Transfer of Assets from Customers* and Standard Interpretation Committee - 31, *Revenue - Barter Transactions Involving Advertising Services*. The new standard introduces a new revenue recognition model for contracts with customers which specifies that revenue should be recognized when (or as) a company transfers control of goods or services to a customer at the amount to which the company expects to be entitled. Depending on whether certain criteria are met, revenue is recognized over time, in a manner that best reflects the company's performance, or at a point in time, when control of the goods or services is transferred to the customer. The standard does not apply to insurance contracts, financial instruments or lease contracts, which fall in the scope of other PFRS. It also does not apply if two companies in the same line of business exchange nonmonetary assets to facilitate sales to other parties. Furthermore, if a contract with a customer is partly in the scope of another PFRS, then the guidance on separation and measurement contained in the other PFRS takes precedence.

However, the FRSC has yet to issue/approve this new revenue standard for local adoption pending completion of a study by the Philippine Interpretations Committee on its impact on the real estate industry. If approved, the standard is effective for annual periods beginning on or after January 1, 2018, with early adoption permitted.

Financial Assets and Financial Liabilities

Date of Recognition. The Group recognizes a financial asset or a financial liability in the consolidated statements of financial position when it becomes a party to the contractual provisions of the instrument. In the case of a regular way purchase or sale of financial assets, recognition is done using settlement date accounting.

Initial Recognition of Financial Instruments. Financial instruments are recognized initially at fair value of the consideration given (in case of an asset) or received (in case of a liability). The initial measurement of financial instruments, except for those designated as at FVPL, includes transaction costs.

'Day 1' Difference. Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and the fair value (a 'Day 1' difference) in the consolidated statements of income unless it qualifies for recognition as some other type of asset. In cases where data used is not observable, the difference between the transaction price and model value is only recognized in the consolidated statements of income when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the 'Day 1' difference amount.

Financial Assets

The Group classifies its financial assets, at initial recognition, in the following categories: financial assets at FVPL, loans and receivables, available-for-sale (AFS) financial assets and held-to-maturity (HTM) investments. The classification depends on the purpose for which the investments are acquired and whether they are quoted in an active market. The Group determines the classification of its financial assets at initial recognition and, where allowed and appropriate, re-evaluates such designation at every reporting date.

The Group has no financial assets classified as HTM investments and AFS financial assets as of December 31, 2015 and 2014.

Financial Assets at FVPL. A financial asset is classified as at FVPL if it is classified as held for trading or is designated as such upon initial recognition. Financial assets are designated as at FVPL if the Group manages such investments and makes purchase and sale decisions based on their fair values in accordance with the documented risk management or investment strategy of the Group. Derivative instruments (including embedded derivatives), except those covered by hedge accounting relationships, are classified under this category.

Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term.

Financial assets may be designated by management at initial recognition as at FVPL, when any of the following criteria is met:

- the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or recognizing gains or losses on a different basis;
- the assets are part of a group of financial assets which are managed and their performances are evaluated on a fair value basis, in accordance with a documented risk management or investment strategy; or
- the financial instrument contains an embedded derivative, unless the embedded derivative does not significantly modify the cash flows or it is clear, with little or no analysis, that it would not be separately recognized.

The Group carries financial assets at FVPL using their fair values. Attributable transaction costs are recognized in the consolidated statements of income as incurred. Fair value changes and realized gains or losses are recognized in the consolidated statements of income. Fair value changes from derivatives accounted for as part of an effective cash flow hedge are recognized in other comprehensive income and presented in the consolidated statements of changes in equity. Any interest earned is recognized as part of "Interest income" account in the consolidated statements of income. Any dividend income from equity securities classified as at FVPL is recognized in the consolidated statements of income when the right to receive payment has been established.

The Group's derivative assets are classified under this category (Notes 10, 32 and 33).

Loans and Receivables. Loans and receivables are non-derivative financial assets with fixed or determinable payments and maturities that are not quoted in an active market. They are not entered into with the intention of immediate or short-term resale and are not designated as AFS financial assets or financial assets at FVPL.

Subsequent to initial measurement, loans and receivables are carried at amortized cost using the effective interest rate method, less any impairment in value. Any interest earned on loans and receivables is recognized as part of "Interest income" account in the consolidated statements of income on an accrual basis. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. The periodic amortization is also included as part of "Interest income" account in the consolidated statements of income. Gains or losses are recognized in the consolidated statements of income when loans and receivables are derecognized or impaired.

Cash includes cash on hand and in banks which are stated at face value. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

The Group's cash and cash equivalents, trade and other receivables and noncurrent receivables and deposits are included under this category (Notes 7, 8, 14, 32 and 33).

Financial Liabilities

The Group classifies its financial liabilities, at initial recognition, in the following categories: financial liabilities at FVPL and other financial liabilities. The Group determines the classification of its financial liabilities at initial recognition and, where allowed and appropriate, re-evaluates such designation at every reporting date. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable transaction costs.

Financial Liabilities at FVPL. Financial liabilities are classified under this category through the fair value option. Derivative instruments (including embedded derivatives) with negative fair values, except those covered by hedge accounting relationships, are also classified under this category.

The Group carries financial liabilities at FVPL using their fair values and reports fair value changes in profit or loss. Fair value changes from derivatives accounted for as part of an effective accounting hedge are recognized in other comprehensive income and presented in the consolidated statements of changes in equity. Any interest expense incurred is recognized as part of "Interest expense and other financing charges" account in the consolidated statements of income.

The Group's derivative liabilities are classified under this category (Notes 16, 32 and 33).

Other Financial Liabilities. This category pertains to financial liabilities that are not designated or classified as at FVPL. After initial measurement, other financial liabilities are carried at amortized cost using the effective interest rate method. Amortized cost is calculated by taking into account any premium or discount and any directly attributable transaction costs that are considered an integral part of the effective interest rate of the liability. The effective interest rate amortization is included in "Interest expense and other financing charges" account in the consolidated statements of income. Gains and losses are recognized in the consolidated statements of income when the liabilities are derecognized as well as through the amortization process.

The Group's liabilities arising from its trade or borrowings such as notes payable, trade and other payables and long-term debt are included under this category (Notes 15, 16, 17, 32 and 33).

Derivative Financial Instrument and Hedging

Embedded Derivatives

The Group assesses whether embedded derivatives are required to be separated from the host contracts when the Group becomes a party to the contract.

An embedded derivative is separated from the host contract and accounted for as a derivative if all of the following conditions are met:

- (a) the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host contract;

- (b) a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- (c) the hybrid or combined instrument is not recognized as at FVPL.

Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

Embedded derivatives that are bifurcated from the host contracts are accounted for either as financial assets or financial liabilities at FVPL.

The Group has not bifurcated any embedded derivatives as of December 31, 2015 and 2014.

Derecognition of Financial Assets and Financial Liabilities

Financial Assets. A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; and either: (a) has transferred substantially all the risks and rewards of the asset; or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of the Group’s continuing involvement. In that case, the Group also recognizes the associated liability. The transferred asset and the associated liability are measured on the basis that reflects the rights and obligations that the Group has retained.

Financial Liabilities. A financial liability is derecognized when the obligation under the liability is discharged or cancelled, or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the consolidated statements of income.

Impairment of Financial Assets

The Group assesses, at the reporting date, whether a financial asset or group of financial assets is impaired.

A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (an incurred loss event) and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

For financial assets carried at amortized cost such as loans and receivables, the Group first assesses whether impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If no objective evidence of impairment has been identified for a particular financial asset that was individually assessed, the Group includes the asset as part of a group of financial assets with similar credit risk characteristics and collectively assesses the group for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be recognized, are not included in the collective impairment assessment.

Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing financial difficulty, default or delinquency in principal or interest payments, or may enter into bankruptcy or other form of financial reorganization intended to alleviate the financial condition of the borrower. For collective impairment purposes, evidence of impairment may include observable data on existing economic conditions or industry-wide developments indicating that there is a measurable decrease in the estimated future cash flows of the related assets.

If there is objective evidence of impairment, the amount of loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses) discounted at the financial asset's original effective interest rate (i.e., the effective interest rate computed at initial recognition). Time value is generally not considered when the effect of discounting the cash flows is not material. If a loan or receivable has a variable rate, the discount rate for measuring any impairment loss is the current effective interest rate, adjusted for the original credit risk premium. For collective impairment purposes, impairment loss is computed based on their respective default and historical loss experience.

The carrying amount of the asset is reduced either directly or through the use of an allowance account. The impairment loss for the period is recognized in the consolidated statements of income. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in the consolidated statements of income, to the extent that the carrying amount of the asset does not exceed its amortized cost at the reversal date.

Classification of Financial Instruments between Liability and Equity

Financial instruments are classified as liability or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity, net of any related income tax benefits.

A financial instrument is classified as liability if it provides for a contractual obligation to:

- deliver cash or another financial asset to another entity;
- exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Group; or
- satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

If the Group does not have an unconditional right to avoid delivering cash or another financial asset to settle its contractual obligation, the obligation meets the definition of a financial liability.

The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole, the amount separately determined as the fair value of the liability component on the date of issue.

Debt Issue Costs

Debt issue costs are considered as an adjustment to the effective yield of the related debt and are deferred and amortized using the effective interest rate method. When a loan is paid, the related unamortized debt issue costs at the date of repayment are recognized in the consolidated statements of income.

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statements of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the consolidated statements of financial position.

Inventories

Finished goods and materials and supplies are valued at the lower of cost and net realizable value (NRV).

Costs incurred in bringing each inventory to its present location and condition are accounted for as follows:

Finished goods	-	at cost, which includes direct materials and labor and a proportion of manufacturing overhead costs based on normal operating capacity but excluding borrowing costs; costs are determined using the moving-average method.
Materials and supplies	-	at cost, using the moving-average method.

Finished Goods. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs necessary to make the sale.

Materials and Supplies. Net realizable value is the current replacement cost.

Containers (i.e., Returnable Bottles and Shells). These are stated at deposit values less any impairment in value. The excess of the acquisition cost of the containers over their deposit value is presented as “Deferred containers” under “Other noncurrent assets - net” account in the consolidated statements of financial position and is amortized over the estimated useful life of ten years. Amortization of deferred containers is included under “General and administrative expenses” account in the consolidated statements of income.

Assets Held for Sale and Discontinued Operation

The Group classifies noncurrent assets, or disposal groups comprising assets and liabilities as held for sale or distribution, if their carrying amounts will be recovered primarily through sale or distribution rather than through continuing use. The assets or disposal groups are generally measured at the lower of their carrying amount and fair value less costs to sell or distribute, except for some assets which are covered by other standards. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on *pro rata* basis, except that no loss is allocated to inventories, financial assets, deferred tax assets and employee benefit assets, which continue to be measured in accordance with the Group's accounting policies. Impairment losses on initial classification as held for sale or distribution and subsequent gains and losses on remeasurement are recognized in the consolidated statements of income. Gains are not recognized in excess of any cumulative impairment losses.

The criteria for held for sale or distribution is regarded as met only when the sale or distribution is highly probable and the asset or disposal group is available for immediate sale or distribution in its present condition. Actions required to complete the sale or distribution should indicate that it is unlikely that significant changes to the sale will be made or that the sale will be withdrawn.

Property, plant and equipment once classified as held for sale or distribution are not depreciated.

Assets and liabilities classified as held for sale or distribution are presented separately as current items in the consolidated statements of financial position.

A discontinued operation is a component of the Group's business, the operations and cash flows of which can be clearly distinguished from the rest of the Group and which: (1) represent a separate major line of business or geographic area of operations; (2) is part of a single coordinated plan to dispose a separate major line of business or graphic area of operations; or (3) is a subsidiary acquired exclusively with a view to re-sale.

Classification as a discontinued operation occurs at the earlier of disposal or when the operation meets the criteria to be classified as held for sale. When an operation is classified as a discontinued operation, the comparative consolidated statements of income are re-presented as if the operation had been discontinued from the start of the comparative period.

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as "Loss from discontinued operations - net of tax" in the consolidated statements of income.

Business Combination

Business combinations are accounted for using the acquisition method as at the acquisition date. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included as part of "General and administrative expenses" account in the consolidated statements of income.

When the Group acquires a business, it assesses the financial assets and financial liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured at the acquisition date fair value and any resulting gain or loss is recognized in the consolidated statements of income.

The Group measures goodwill at the acquisition date as: a) the fair value of the consideration transferred; plus b) the recognized amount of any non-controlling interests in the acquiree; plus c) if the business combination is achieved in stages, the fair value of the existing equity interest in the acquiree; less d) the net recognized amount (generally fair value) of the identifiable assets acquired and liabilities assumed. When the excess is negative, a bargain purchase gain is recognized immediately in the consolidated statements of income. Subsequently, goodwill is measured at cost less any accumulated impairment in value. Goodwill is reviewed for impairment, annually or more frequently, if events or changes in circumstances indicate that the carrying amount may be impaired.

The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognized in the consolidated statements of income. Costs related to the acquisition, other than those associated with the issuance of debt or equity securities that the Group incurs in connection with a business combination, are expensed as incurred. Any contingent consideration payable is measured at fair value at the acquisition date. If the contingent consideration is classified as equity, it is not remeasured and settlement is accounted for within equity. Otherwise, subsequent changes to the fair value of the contingent consideration are recognized in the consolidated statements of income.

Goodwill in a Business Combination

Goodwill acquired in a business combination is, from the acquisition date, allocated to each of the cash-generating units, or groups of cash-generating units that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities are assigned to those units or groups of units. Each unit or group of units to which the goodwill is allocated:

- represents the lowest level within the Group at which the goodwill is monitored for internal management purposes; and
- is not larger than an operating segment determined in accordance with PFRS 8.

Impairment is determined by assessing the recoverable amount of the cash-generating unit or group of cash-generating units, to which the goodwill relates. Where the recoverable amount of the cash-generating unit or group of cash-generating units is less than the carrying amount, an impairment loss is recognized. Where goodwill forms part of a cash-generating unit or group of cash-generating units and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained. An impairment loss with respect to goodwill is not reversed.

Transactions under Common Control

Transactions under common control entered into in contemplation of each other and business combination under common control designed to achieve an overall commercial effect are treated as a single transaction.

Transfers of assets between commonly controlled entities are accounted for using book value accounting.

Investments in Joint Ventures

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The considerations made in determining joint control is similar to those necessary to determine control over subsidiaries.

The Group's investments in joint ventures are accounted for using the equity method.

Under the equity method, the investment in joint venture is initially recognized at cost. The carrying amount of the investment is adjusted to recognize the changes in the Group's share of net assets of the joint venture since the acquisition date. Goodwill relating to the joint venture is included in the carrying amount of the investment and is neither amortized nor individually tested for impairment.

The Group's share in profit or loss of joint venture is recognized as "Equity in net losses of joint ventures" account in the consolidated statements of income. Adjustments to the carrying amount may also be necessary for changes in the Group's proportionate interest in the joint venture arising from changes in the joint venture's other comprehensive income. The Group's share of these changes is recognized as "Share in other comprehensive income (loss) of joint ventures" account in the consolidated statements of comprehensive income. Unrealized gains and losses resulting from transactions between the Group and the joint venture are eliminated to the extent of the interest in the joint venture.

When the Group's share of losses in a joint venture equals or exceeds its interest in the joint ventures, the Group does not recognize further losses, unless it has incurred obligation or made payments on behalf of the joint venture.

After application of the equity method, the Group determines whether it is necessary to recognize an impairment loss with respect to the Group's net investment in the joint venture. At each reporting date, the Group determines whether there is objective evidence that the investment in the joint venture is impaired. If there is such evidence, the Group recalculates the amount of impairment as the difference between the recoverable amount and carrying amount of the joint venture. Such impairment loss is recognized as part of "Equity in net losses of joint ventures" account in the consolidated statements of income.

Upon loss of joint control over the joint venture, the Group measures and recognizes any retained investment at fair value. Any difference between the carrying amount of the joint venture upon loss of joint control and the fair value of the retained investment and proceeds from disposal is recognized in the consolidated statements of income.

The financial statements of the joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

Property, Plant and Equipment

Property, plant and equipment, except for land, are stated at cost less accumulated depreciation and amortization and any accumulated impairment in value. Such cost includes the cost of replacing part of the property, plant and equipment at the time the cost is incurred, if the recognition criteria are met, and excludes the costs of day-to-day servicing. Land is stated at cost less any impairment in value.

The initial cost of property, plant and equipment comprises its construction cost or purchase price, including import duties, taxes and any directly attributable costs in bringing the asset to its working condition and location for its intended use. Cost also includes any related asset retirement obligation (ARO). Expenditures incurred after the asset has been put into operation, such as repairs, maintenance and overhaul costs, are normally recognized as expense in the period the costs are incurred. Major repairs are capitalized as part of property, plant and equipment only when it is probable that future economic benefits associated with the items will flow to the Group and the cost of the items can be measured reliably.

Capital projects in progress (CPIP) represents the amount of accumulated expenditures on unfinished and/or ongoing projects. This includes the costs of construction and other direct costs. Borrowing costs that are directly attributable to the construction of plant and equipment are capitalized during the construction period. CPIP is not depreciated until such time that the relevant assets are ready for use.

Depreciation and amortization, which commence when the assets are available for their intended use, are computed using the straight-line method over the following estimated useful lives of the assets:

	Number of Years
Land improvements	5 - 10
Buildings and building improvements	20 - 50
Transportation equipment	5
Machinery and equipment	3 - 40
Furniture, fixtures and other equipment	2 - 5
Leasehold improvements	10 - 30
	or term of the lease, whichever is shorter

The remaining useful lives, residual values, and depreciation and amortization methods are reviewed and adjusted periodically, if appropriate, to ensure that such periods and methods of depreciation and amortization are consistent with the expected pattern of economic benefits from the items of property, plant and equipment.

The carrying amounts of property, plant and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying amounts may not be recoverable.

Fully depreciated assets are retained in the accounts until they are no longer in use.

An item of property, plant and equipment is derecognized when either it has been disposed of or when it is permanently withdrawn from use and no future economic benefits are expected from its use or disposal. Any gain or loss arising from the retirement and disposal of an item of property, plant and equipment (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated statements of income in the period of retirement and disposal.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. Subsequently, intangible assets are carried at cost less accumulated amortization and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditures are recognized in the consolidated statements of income in the year in which the related expenditures are incurred. The useful lives of intangible assets are assessed to be either finite or indefinite.

Intangible assets with finite lives are amortized over the useful life and assessed for impairment whenever there is an indication that the intangible assets may be impaired. The amortization period and the amortization method used for an intangible asset with a finite useful life are reviewed at least at each reporting date. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimate. The amortization expense on intangible assets with finite lives is recognized in the consolidated statements of income consistent with the function of the intangible asset.

Amortization is computed using the straight-line method over the estimated useful life of four to ten years.

Gains or losses arising from the disposal of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognized in the consolidated statements of income when the asset is derecognized.

Impairment of Non-financial Assets

The carrying amounts of investments in joint ventures, property, plant and equipment, intangible assets, deferred containers and idle assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level. If any such indication exists, and if the carrying amount exceeds the estimated recoverable amount, the assets or cash-generating units are written down to their recoverable amounts. The recoverable amount of the asset is the greater of fair value less costs to sell and value in use. The fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less costs of disposal. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs. Impairment losses are recognized in the consolidated statements of income in those expense categories consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statements of income. After such a reversal, the depreciation and amortization charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Fair Value Measurements

The Group measures a number of financial and non-financial assets and liabilities at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or most advantageous market must be accessible to the Group.

The fair value of an asset or liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: inputs for the asset or liability that are not based on observable market data.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

Provisions

Provisions are recognized when: (a) the Group has a present obligation (legal or constructive) as a result of past events; (b) it is probable (i.e., more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation; and (c) a reliable estimate of the amount of the obligation can be made. Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognized as a separate asset only when it is virtually certain that reimbursement will be received. The amount recognized for the reimbursement shall not exceed the amount of the provision. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Capital Stock and Additional Paid-in Capital

Common Shares

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of any tax effects.

Preferred Shares

Preferred shares are classified as equity if they are non-redeemable, or redeemable only at the Company's option, and any dividends thereon are discretionary. Dividends thereon are recognized as distributions within equity upon approval by the BOD of the Company.

Preferred shares are classified as a liability if they are redeemable on a specific date or at the option of the shareholders, or if dividend payments are not discretionary. Dividends thereon are recognized as interest expense in the consolidated statements of income as accrued.

Additional Paid-in Capital

When the shares are sold at premium, the difference between the proceeds and the par value is credited to the "Additional paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case the shares are issued to extinguish or settle the liability of the Company, the shares are measured either at the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Treasury Shares

Own equity instruments which are reacquired are carried at cost and deducted from equity. No gain or loss is recognized on the purchase, sale, reissuance or cancellation of the Company's own equity instruments. When the shares are retired, the capital stock account is reduced by its par value and the excess of cost over par value upon retirement is debited to additional paid-in capital to the extent of the specific or average additional paid-in capital when the shares were issued and to retained earnings for the remaining balance.

Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits associated with the transaction will flow to the Group and the amount of revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty. The Group assesses its revenue arrangements against specific criteria in order to determine if it is acting as principal or agent.

The following specific recognition criteria must also be met before revenue is recognized:

Revenue from Sale of Goods

Revenue from sale of goods in the course of ordinary activities is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates. Revenue is recognized when the significant risks and rewards of ownership of the goods have passed to the buyer, which is normally upon delivery, and the amount of revenue can be measured reliably.

Revenue from Rendering of Services

Revenue is recognized upon satisfactory performance of services which is manufacturing and bottling of NAB in favor of the customer where such production inputs are in the name of the customer.

Others

Interest income is recognized as the interest accrues, taking into account the effective yield on the asset.

Dividend income is recognized when the Group's right to receive the payment is established.

Rent income from operating lease is recognized on a straight-line basis over the related lease terms. Lease incentives granted are recognized as an integral part of the total rent income over the term of the lease.

Costs and Expenses

Costs and expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decreases in equity, other than those relating to distributions to equity participants. Expenses are recognized when incurred.

Share-based Payment Transactions

Under the Group's Employee Stock Purchase Plan (ESPP), executives and employees of the Group receive remuneration in the form of share-based payment transactions, whereby the executives and employees render services as consideration for equity instruments of the Company. Such transactions are handled centrally by the Company.

Share-based transactions in which the Company grants option rights to its equity instruments directly to the Group's employees are accounted for as equity-settled transactions.

The cost of ESPP is measured by reference to the market price at the time of the grant less subscription price.

The cost of share-based payment transactions is recognized, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled, ending on the date when the relevant employees become fully entitled to the award (the “vesting date”). The cumulative expenses recognized for share-based payment transactions at each reporting date until the vesting date reflect the extent to which the vesting period has expired and the Company’s best estimate of the number of equity instruments that will ultimately vest. Where the terms of a share-based award are modified, as a minimum, an expense is recognized as if the terms had not been modified. In addition, an expense is recognized for any modification, which increases the total fair value of the share-based payment arrangement, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognized for the award is recognized immediately.

However, if a new award is substituted for the cancelled award and designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were a modification of the original award.

Leases

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset. A reassessment is made after the inception of the lease only if one of the following applies:

- (a) there is a change in contractual terms, other than a renewal or extension of the arrangement;
- (b) a renewal option is exercised or an extension is granted, unless the term of the renewal or extension was initially included in the lease term;
- (c) there is a change in the determination of whether fulfillment is dependent on a specific asset; or
- (d) there is a substantial change to the asset.

Where a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gives rise to the reassessment for scenarios (a), (c) or (d), and at the date of renewal or extension period for scenario (b) above.

Operating Lease

Group as Lessee. Leases which do not transfer to the Group substantially all the risks and rewards of ownership of the asset are classified as operating leases. Operating lease payments are recognized as an expense in the consolidated statements of income on a straight-line basis over the lease term. Associated costs such as maintenance and insurance are expensed as incurred.

Group as Lessor. Leases where the Group does not transfer substantially all the risks and rewards of ownership of the assets are classified as operating leases. Rent income from operating leases is recognized as income on a straight-line basis over the lease term. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized as an expense over the lease term on the same basis as rent income. Contingent rents are recognized as income in the period in which they are earned.

Borrowing Costs

Borrowing costs directly attributable to the acquisition or construction of an asset that necessarily takes a substantial period of time to get ready for its intended use are capitalized as part of the cost of the respective assets. All other borrowing costs are expensed in the period they occur. Capitalization of borrowing costs commences when the activities to prepare the asset are in progress and expenditures and borrowing costs are being incurred. Borrowing costs are capitalized until the assets are substantially ready for their intended use.

Research Costs

Research costs are expensed as incurred.

Employee Benefits

Short-term Employee Benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Retirement Costs

The Company and DBI have separate funded, noncontributory retirement plans, administered by the respective trustees, covering their respective permanent employees. The cost of providing benefits under the defined benefit retirement plan is actuarially determined using the projected unit credit method. Projected unit credit method reflects services rendered by employees to the date of valuation and incorporates assumptions concerning employees' projected salaries. Actuarial gains and losses are recognized in full in the period in which they occur in other comprehensive income. Such actuarial gains and losses are also immediately recognized in equity and are not reclassified to profit or loss in subsequent period.

The net defined benefit retirement liability or asset is the aggregate of the present value of the amount of future benefit that employees have earned in return for their service in the current and prior periods, reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of economic benefits available in the form of reductions in future contributions to the plan.

Defined benefit costs comprise the following:

- Service costs
- Net interest on the defined benefit retirement liability or asset
- Remeasurements of defined benefit retirement liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in the consolidated statements of income. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuary.

Net interest on the net defined benefit retirement liability or asset is the change during the period as a result of contributions and benefit payments, which is determined by applying the discount rate based on the government bonds to the net defined benefit retirement liability or asset. Net interest on the net defined benefit retirement liability or asset is recognized as expense or income in the consolidated statements of income.

Remeasurements of net defined benefit retirement liability or asset comprising actuarial gains and losses, return on plan assets, and any change in the effect of the asset ceiling (excluding net interest) are recognized immediately in other comprehensive income in the period in which they arise.

When the benefits of a plan are changed, or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in the consolidated statements of income. The Group recognizes gains and losses on the settlement of a defined benefit retirement plan when the settlement occurs.

Foreign Currency

Foreign Currency Translations

Transactions in foreign currencies are translated to the respective functional currencies of the Group entities at exchange rates at the dates of the transactions. Monetary assets and monetary liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the reporting date. The foreign currency gain or loss on monetary items is the difference between amortized cost in the functional currency at the beginning of the year, adjusted for effective interest and payments during the year, and the amortized cost in foreign currency translated at the exchange rate at the reporting date.

Nonmonetary assets and nonmonetary liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rate at the date the fair value was determined. Nonmonetary items in foreign currencies that are measured in terms of historical cost are translated using the exchange rate at the date of the transaction.

Foreign currency differences arising on translation are recognized in the consolidated statements of income, except for differences arising on the translation of AFS financial assets, a financial liability designated as an effective hedge of the net investment in a foreign operation or qualifying cash flow hedges, which are recognized in other comprehensive income.

Foreign Operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated to Philippine peso at exchange rates at the reporting date. The income and expenses of foreign operations, excluding foreign operations in hyperinflationary economies, are translated to Philippine peso at average exchange rates for the period.

Foreign currency differences are recognized in other comprehensive income and presented in the “Cumulative translation adjustments” account in the consolidated statements of changes in equity. When a foreign operation is disposed of such that control or joint control is lost, the cumulative amount in the cumulative translation adjustments related to that foreign operation is reclassified to the consolidated statements of income as part of the gain or loss on disposal.

When the Group disposes of only part of its investment in joint venture that includes a foreign operation while retaining joint control, the relevant proportion of the cumulative amount is reclassified in the consolidated statements of income.

When the settlement of a monetary item receivable from or payable to a foreign operation is neither planned nor likely to occur in the foreseeable future, foreign exchange gains and losses arising from such a monetary item are considered to form part of a net investment in a foreign operation and are recognized in other comprehensive income and presented in the “Cumulative translation adjustments” account in the consolidated statements of changes in equity.

The functional currency of GSMIL, GSMIHL, GBHL and SHL is the Philippine peso, while that of Thai San Miguel Liquor Co. Ltd. (TSML) and Thai Ginebra Trading (TGT) is the Thailand Baht (THB). The assets and liabilities of TSML and TGT are translated into the presentation currency of the Company at the rate of exchange ruling at the reporting date and their income and expenses are translated at the average exchange rates for the year.

Taxes

Current Tax. Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred Tax. Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- where the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- with respect to taxable temporary differences associated with investments in shares of stock of subsidiaries and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, carryforward benefits of unused tax credits - Minimum Corporate Income Tax (MCIT) and unused tax losses - Net Operating Loss Carry Over (NOLCO), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward benefits of MCIT and NOLCO can be utilized, except:

- where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- with respect to deductible temporary differences associated with investments in shares of stock of subsidiaries and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

In determining the amount of current and deferred tax, the Group takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. The Group believes that its accruals for tax liabilities are adequate for all open tax years based on its assessment of many factors, including interpretation of tax laws and prior experience. This assessment relies on estimates and assumptions and may involve a series of judgments about future events. New information may become available that causes the Group to change its judgment regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the period that such a determination is made.

Current tax and deferred tax are recognized in the consolidated statements of income except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive income.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Value-added Tax (VAT). Revenues, expenses and assets are recognized net of the amount of VAT, except:

- where the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables that are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of “Prepaid expenses and other current assets” or “Income and other taxes payable” accounts in the consolidated statements of financial position.

Related Parties

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions. Parties are also considered to be related if they are subject to common control and significant influence. Related parties may be individuals or corporate entities. Transactions between related parties are on an arm’s length basis in a manner similar to transactions with non-related parties.

Basic and Diluted Earnings Per Common Share (EPS)

Basic EPS is computed by dividing the net income (loss) for the period attributable to equity holders of the Company, net of dividends on preferred shares, by the weighted average number of issued and outstanding common shares during the period, with retroactive adjustment for any stock dividends declared.

Diluted EPS is computed in the same manner, adjusted for the effects of the shares issuable to employees and executives under the ESPP of the Company, which are assumed to be exercised at the date of grant.

Where the effect of the assumed conversion of shares issuable to employees and executives under the stock purchase plan of the Company would be anti-dilutive, diluted EPS is not presented.

Operating Segments

The Group's operating segments are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. Financial information on operating segments is presented in Note 5 to the consolidated financial statements. The President (the chief operating decision maker) reviews management reports on a regular basis.

The measurement policies the Group used for segment reporting under PFRS 8 are the same as those used in the consolidated financial statements. There have been no changes in the measurement methods used to determine reported segment profit or loss from prior periods. All inter-segment transfers are carried out at arm's length prices.

Segment revenues, expenses and performance include sales and purchases between business segments. Such sales and purchases are eliminated in consolidation.

Contingencies

Contingent liabilities are not recognized in the consolidated financial statements. They are disclosed in the notes to the consolidated financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements when an inflow of economic benefits is probable.

Events After the Reporting Date

Post year-end events that provide additional information about the Group's financial position at the reporting date (adjusting events) are reflected in the consolidated financial statements. Post year-end events that are not adjusting events are disclosed in the notes to the consolidated financial statements when material.

4. Significant Accounting Judgments, Estimates and Assumptions

The preparation of the consolidated financial statements in accordance with PFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the amounts of assets, liabilities, income and expenses reported in the consolidated financial statements at the reporting date. However, uncertainty about these judgments, estimates and assumptions could result in an outcome that could require a material adjustment to the carrying amount of the affected asset or liability in the future.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions are recognized in the period in which the judgments and estimates are revised and in any future period affected.

Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements:

Operating Lease Commitments - Group as Lessor/Lessee. The Group has entered into various lease agreements either as a lessor or a lessee. The Group had determined that it retains all the significant risks and rewards of ownership of the property leased out on operating leases while the significant risks and rewards for property leased from third parties are retained by the lessors.

Rent income, recognized as part of "Other income (charges)" account in the consolidated statements of income, amounted to P4,733, P8,072 and nil in 2015, 2014 and 2013, respectively (Notes 26 and 28).

Rent expense recognized in the consolidated statements of income amounted to P145,102, P153,827 and P166,032 in 2015, 2014 and 2013, respectively (Notes 6, 20, 21, 22 and 28).

Classification of Joint Arrangements. The Group has determined that it has rights only to the net assets of TSML and TGT based on the structure, legal form, contractual terms and other facts and circumstances of the arrangement. As such, the Group classified its joint arrangements as joint ventures (Note 11).

Contingencies. The Group is currently involved in various pending claims and lawsuits which could be decided in favor of or against the Group. The Group's estimate of the probable costs for the resolution of these pending claims and lawsuits has been developed in consultation with in-house as well as outside legal counsel handling the prosecution and defense of these matters and is based on an analysis of potential results. The Group currently does not believe that these pending claims and lawsuits will have a material adverse effect on its financial position and financial performance. It is possible, however, that future financial performance could be materially affected by the changes in the estimates or in the effectiveness of strategies relating to these proceedings. No accruals were made in relation to these proceedings (Note 34).

Estimates and Assumptions

The key estimates and assumptions used in the consolidated financial statements are based upon management's evaluation of relevant facts and circumstances as of the date of the consolidated financial statements. Actual results could differ from such estimates.

Fair Value Measurements. A number of the Group's accounting policies and disclosures require the measurement of fair values for both financial and non-financial assets and liabilities.

The Group has an established control framework with respect to the measurement of fair values. This includes a valuation team that has the overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values. The valuation team regularly reviews significant unobservable inputs and valuation adjustments. If third party information is used to measure fair values, then the valuation team assesses the evidence obtained to support the conclusion that such valuations meet the requirements of PFRS, including the level in the fair value hierarchy in which such valuations should be classified.

The Group uses market observable data when measuring the fair value of an asset or liability. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques (Note 3).

If the inputs used to measure the fair value of an asset or a liability can be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy based on the lowest level input that is significant to the entire measurement.

The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

The methods and assumptions used to estimate the fair values for both financial and non-financial assets and liabilities are discussed in Notes 11, 12, 13, 29, 32, and 33.

Allowance for Impairment Losses on Trade and Other Receivables and Noncurrent Receivables and Deposits. Provisions are made for specific and groups of accounts, where objective evidence of impairment exists. The Group evaluates these accounts on the basis of factors that affect the collectability of the accounts. These factors include, but are not limited to, the length of the Group's relationship with the customers and counterparties, the current credit status based on third party credit reports and known market forces, average age of accounts, collection experience and historical loss experience. The amount and timing of the recorded expenses for any period would differ if the Group made different judgments or utilized different methodologies. An increase in the allowance for impairment losses would increase the recorded general and administrative expenses and decrease current and noncurrent assets.

The allowance for impairment losses on trade and other receivables and noncurrent receivables and deposits, included as part of "Other noncurrent assets - net" account in the consolidated statements of financial position, amounted to P421,168 and P255,204 as of December 31, 2015 and 2014, respectively.

The carrying amounts of trade and other receivables, and noncurrent receivables and deposits amounted to P2,989,550 and P4,111,449 as of December 31, 2015 and 2014, respectively (Notes 8 and 14).

Write-down of Inventory. The Group writes-down the cost of inventory to net realizable value whenever net realizable value becomes lower than cost due to damage, physical deterioration, obsolescence, changes in price levels or other causes.

Estimates of net realizable value are based on the most reliable evidence available at the time the estimates are made of the amount the inventories are expected to be realized. These estimates take into consideration fluctuations of price or cost directly relating to events occurring after the reporting date to the extent that such events confirm conditions existing at the reporting date.

The accumulated amount of write-down of inventories amounted to P317,669 and P137,904 as of December 31, 2015 and 2014, respectively.

The carrying amount of inventories amounted to P3,090,271 and P2,657,197 as of December 31, 2015 and 2014, respectively (Note 9).

Estimated Useful Lives of Property, Plant and Equipment and Deferred Containers. The Group estimates the useful lives of property, plant and equipment and deferred containers based on the period over which the assets are expected to be available for use. The estimated useful lives of property, plant and equipment and deferred containers are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets.

In addition, estimation of the useful lives of property, plant and equipment and deferred containers is based on collective assessment of industry practice, internal technical evaluation and experience with similar assets. It is possible, however, that future financial performance could be materially affected by changes in estimates brought about by changes in factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of property, plant and equipment and deferred containers would increase the recorded cost of sales, selling and marketing expenses, general and administrative expenses and decrease noncurrent assets.

Property, plant and equipment, net of accumulated depreciation and amortization amounted to P5,882,427 and P6,244,426 as of December 31, 2015 and 2014, respectively. Accumulated depreciation and amortization of property, plant and equipment amounted to P6,510,264 and P6,885,820 as of December 31, 2015 and 2014, respectively (Note 12).

Deferred containers, net of accumulated amortization, included as part of “Other noncurrent assets - net” account in the consolidated statements of financial position amounted to P288,117 and P334,575 as of December 31, 2015 and 2014, respectively (Note 14).

Estimated Useful Life of Intangible Assets. The useful life of intangible assets are assessed at the individual asset level as having either a finite or indefinite life.

Intangible assets, net of accumulated amortization, included as part of “Other noncurrent assets - net” account in the consolidated statements of financial position amounted to P44,450 and P3,790 as of December 31, 2015 and 2014, respectively. Accumulated amortization of intangible assets amounted to P50,609 and P43,316 as of December 31, 2015 and 2014, respectively (Note 14).

Impairment of Goodwill with Indefinite Useful Life. The Group determines whether goodwill is impaired at least annually. This requires the estimation of value in use of the cash-generating units to which the goodwill is allocated. Estimating value in use requires management to make an estimate of the expected future cash flows from the cash-generating unit and to choose a suitable discount rate to calculate the present value of those cash flows.

The carrying amount of goodwill amounted to P126,863 and P226,863 as of December 31, 2015 and 2014, respectively (Note 13).

Acquisition Accounting. The Group accounts for acquired businesses using the acquisition method of accounting which requires that the assets acquired and the liabilities assumed are recognized at the date of acquisition based on their respective fair values.

The application of the acquisition method requires certain estimates and assumptions concerning the determination of the fair values of acquired intangible assets and property, plant and equipment, as well as liabilities assumed at the acquisition date. Moreover, the useful lives of the acquired intangible assets and property, plant and equipment have to be determined. Accordingly, for significant acquisitions, the Group obtains assistance from valuation specialists. The valuations are based on information available at the acquisition date.

The Group recognized goodwill arising from an acquisition in 2012 (Note 13).

Realizability of Deferred Tax Assets. The Group reviews its deferred tax assets at each reporting date and reduces the carrying amount to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilized. The Group's assessment on the recognition of deferred tax assets on deductible temporary difference and carryforward benefits of MCIT and NOLCO is based on the projected taxable income in the following periods.

Deferred tax assets amounted to P810,305 and P1,116,010 as of December 31, 2015 and 2014, respectively (Note 18).

Impairment of Non-financial Assets. PFRS requires that an impairment review be performed on investments in joint ventures, property, plant and equipment, intangible assets, deferred containers and idle assets when events or changes in circumstances indicate that the carrying amount may not be recoverable. Determining the recoverable amounts of these assets requires the estimation of cash flows expected to be generated from the continued use and ultimate disposition of such assets. While it is believed that the assumptions used in the estimation of fair values reflected in the consolidated financial statements are appropriate and reasonable, significant changes in these assumptions may materially affect the assessment of recoverable amounts and any resulting impairment loss could have a material adverse impact on the financial performance.

Accumulated impairment losses on investment in joint ventures and property, plant and equipment amounted to P393,800 and P307,600 as of December 31, 2015 and 2014, respectively (Notes 11 and 12).

The combined carrying amounts of investments in joint ventures, property, plant and equipment, intangible assets, deferred containers and idle assets amounted to P6,432,244 and P6,934,679 as of December 31, 2015 and 2014, respectively (Notes 11, 12 and 14).

Present Value of Defined Benefit Retirement Obligation. The present value of the defined benefit retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. These assumptions are described in Note 29 to the consolidated financial statements and include discount rate and salary increase rate.

The Group determines the appropriate discount rate at the end of each reporting period. It is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the retirement obligations. In determining the appropriate discount rate, the Group considers the interest rates on government bonds that are denominated in the currency in which the benefits will be paid. The terms to maturity of these bonds should approximate the terms of the related retirement obligation.

Other key assumptions for the defined benefit retirement obligation are based in part on current market conditions.

While it is believed that the Group's assumptions are reasonable and appropriate, significant differences in actual experience or significant changes in assumptions may materially affect the Group's defined benefit retirement obligation.

The present value of defined benefit retirement obligation amounted to P1,074,331 and P763,688 as of December 31, 2015 and 2014, respectively (Note 29).

Asset Retirement Obligation. Determining ARO requires estimation of the costs of dismantling, installing and restoring leased properties to their original condition. The Group determined that there are no significant ARO as of December 31, 2015 and 2014. While it is believed that the assumptions used in the estimation of such costs are reasonable, significant changes in these assumptions may materially affect the recorded expense or obligation in future periods.

5. Segment Information

Operating Segments

The reporting format of the Group's operating segments is determined based on the Group's risks and rates of return which are affected predominantly by differences in the products and services produced. The operating businesses are organized and managed separately according to the nature of the products produced and services provided, with each segment representing a strategic business unit that offers different products and serves different markets.

The Group is organized into two major operating segments namely alcoholic and NAB.

The alcoholic segment produces and markets alcoholic beverages.

The nonalcoholic segment is involved in the production and marketing of NAB.

For each of the operating segments, the chief operating decision maker reviews internal management reports on at least monthly basis.

Segment Assets and Liabilities

Segment assets include all operating assets used by a segment and consist primarily of operating cash, trade and other receivables, inventories, assets held for sale and property, plant and equipment, net of allowances, accumulated depreciation and amortization, and impairment. Segment liabilities include all operating liabilities and consist primarily of trade and other payables and income and other taxes payable. Segment assets and liabilities do not include deferred taxes.

Major Customer

The Group does not have a single external customer from which sales revenue generated amounted to 10% or more of the total revenues of the Group.

The Group's revenue from external customers and noncurrent assets are mainly in the Philippines.

Financial information about operating segments follows:

6. Discontinued Operation

On December 5, 2014, the BOD of GSMI authorized the sale and transfer of certain NAB assets of the Company to SMB, a related party, consisting of property, plant and equipment as of December 31, 2014 and inventories as of March 31, 2015 (“Transaction”). As such, the Company reclassified the following NAB assets as held for sale as of December 31, 2014:

	<i>Note</i>	2014
Property and equipment	12	P193,941
Finished goods and other inventories		353,765
Assets held for sale		P547,706

In 2015, the Company received a total of P445,642 for the sale of the assets used in its NAB business and executed the following: (a) Deed of Sale of property, plant and equipment (“NAB PPE”) executed on April 1, 2015; and (b) Deed of Sale of finished goods inventories and other inventories consisting of containers on hand, raw materials, goods-in-process and packaging materials executed on April 30, 2015. The purchase price is net of adjustments to the price of the NAB PPE after subsequent validation and confirmation by the parties. As a result of the Transaction, the Group recognized a gain amounting to P37,334, included as part of “Gain on sale of property and equipment” account.

Certain accounts in the consolidated statements of income have been reclassified to show the discontinued operations separately from continuing operations. Details of the discontinued operations for 2015, 2014 and 2013 are as follows:

	2015	2014	2013

The net cash flows used in operating activities of NAB segment amounted to (P3,137), (P2,756) and (P2,084) in 2015, 2014 and 2013, respectively.

7. Cash and Cash Equivalents

Cash and cash equivalents consist of:

	<i>Note</i>	2015	2014
Cash in banks and on hand		P273,301	P289,731
Short-term investments		172,500	290,186
	32, 33	P445,801	P579,917

Cash in banks earn interest at the respective bank deposit rates. Short-term investments include demand deposits which can be withdrawn at anytime depending on the immediate cash requirements of the Group and earn interest at the respective short-term investment rates.

8. Trade and Other Receivables

Trade and other receivables consist of:

	<i>Note</i>	2015	2014
Trade		P2,104,005	P2,988,257
Amounts owed by related parties	27	820,774	920,268

Less allowance for impairment losses		324,361	189,274
	32, 33	P2,802,212	P3,921,468

Trade receivables are non-interest bearing and are generally on a 60 to 90-day term.

Non-trade receivables consist of the following: (i) advances to supplier amounting to P1,598 and P1,252 as of December 31, 2015 and 2014, respectively; (ii) subscription receivables amounting to P335 and P4,975 as of December 31, 2015 and 2014, respectively; (iii) receivable from employees amounting to P16,471 and P24,121 as of December 31, 2015 and 2014, respectively; (iv) sale of raw materials amounting to P130,926 and P130,781 as of December 31, 2015 and 2014, respectively; and (v) miscellaneous receivables amounting to P52,464 and P41,088 as of December 31, 2015 and 2014, respectively. These are generally collectible on demand.

The movements in allowance for impairment losses are as follows:

	<i>Note</i>	2015	2014
Balance at beginning of year		P189,274	P108,194
Provision for impairment losses	22	152,883	81,080
Amounts written off		(17,796)	-
Balance at end of year		P324,361	P189,274

The aging of trade and other receivables is as follows:

	P2,988,257	P202,217	P920,268	P4,110,742

Various collaterals for trade receivables such as bank guarantees, cash bond, time deposit and real estate mortgages are held by the Group for certain credit limits.

The Group believes that the unimpaired amounts that are past due by more than 30 days are still collectible based on historical payment behavior and analyses of the underlying customer credit ratings. There are no significant changes in their credit quality (Note 32).

9. Inventories

Inventories consist of:

	2015	2014
At NRV:		
Finished goods	P663,037	P863,623
Materials and supplies	2,388,643	1,793,574
Containers	38,591	-
	P3,090,271	P2,657,197

The cost of finished goods and materials and supplies amounted to P3,369,349 and P2,795,101 as of December 31, 2015 and 2014, respectively.

The amount of inventories recognized as expense amounted to P10,672,125, P9,439,825 and P9,140,314 in 2015, 2014 and 2013, respectively (Note 20).

The write-down of inventories to net realizable value amounted to P195,683 and P68,000 in 2015 and 2014, respectively (Note 20). The Group has written off inventories amounting to P15,918 in 2015.

The accumulated amount of write-down of inventories amounted to P317,669 and P137,904 as of December 31, 2015 and 2014, respectively.

10. Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets consist of:

	<i>Note</i>	2015	2014
Prepaid taxes		P1,538,778	P1,517,112
Derivative assets	32, 33	430	52
Others		50,030	51,877
		P1,589,238	P1,569,041

Prepaid taxes represent prepayments of excise taxes on alcohol and income taxes.

11. Investments in Joint Ventures

a. TSML

GSMI, through GSMIL, has an existing joint venture with Thai Life Group of Companies (Thai Life) covering the ownership and operations of TSML. TSML is a limited company organized under the laws of Thailand in which GSMIL owns 40% ownership interest. TSML holds a license in Thailand to engage in the business of manufacturing alcohol and manufacturing, selling and distributing brandy, wine and distilled spirits products both for domestic and export markets.

Through the acquisition by SHL of the 49% ownership interest in Siam Wine Liquor Co., Ltd. (SWL) and SWL's acquisition of shares representing 10% ownership of the outstanding capital stock of TSML, the Group's share in TSML increased from 40% to 44.9%. The acquisition was funded through advances made by GSMI to GBHL, which has an existing loan agreement with SWL for the same amount.

Summarized financial information of TSML, as included in its own financial statements, and the reconciliation with the carrying amount of the investment are set out below:

	2015	2014	2013
Current assets (including cash and cash equivalents - 2015: P199,953, 2014: P103,873 and 2013: P141,673)	P1,357,379	P1,282,143	P1,319,308

Total comprehensive loss	(P48,438)	(P60,701)	(P68,544)

The recoverable amount of investment in TSML has been determined based on a valuation using cash flow projections covering a five-year period based on long range plans approved by management. Cash flows beyond the five-year period are extrapolated using a constant growth rate determined per individual cash-generating unit. This growth rate is consistent with the long-term average growth rate for the industry. The discount rates applied to after tax cash flow projections is 9% in 2015. The discount rate also imputes the risk of the cash-generating units compared to the respective risk of the overall market and equity risk premium.

As a result of decline in operations resulting in lower sales forecast compared with previous years, the Group recognized impairment loss amounting to P86,200 in 2015, included as part of "Equity in Net Losses of Joint Ventures" account, in the consolidated statements of income. The recoverable amount of investment in TSML has been categorized as Level 3 in the fair value hierarchy based on the inputs used in the valuation technique (Note 4).

b. TGT

GSMI, through GSMIHL, also has an existing 40% ownership interest in TGT, which was formed as another joint venture with Thai Life. TGT functions as the selling and distribution arm of TSML.

Through the acquisition of SWL of the 10% ownership interest in TGT, the Group's share in TGT increased from 40% to 44.9%. The acquisition was funded through advances made by GSMI to GBHL which has an existing loan agreement with SWL for the same amount.

Summarized financial information of TGT, as included in its own financial statements, and the reconciliation with the carrying amount of the investment are set out below:

	2015	2014	2013
Current assets (including cash and cash equivalents - 2015: P26,126, 2014: P80,571 and 2013: P61,904)	P40,096	P95,262	P105,156

Total comprehensive loss	(P20,399)	(P8,096)	(P34,637)

The Group discontinued recognizing its share in the net liabilities of TGT since the cumulative losses including the share in other comprehensive loss already exceed the cost of investment. If TGT reports profits subsequently, the Group resumes recognizing its share of those profits after its share of the profits equals the share of net losses not recognized. Unrecognized share in net liabilities amounted to P332,468 and P339,977 as of December 31, 2015 and 2014, respectively.

12. Property, Plant and Equipment

The carrying amounts of unutilized machinery and equipment, net of accumulated impairment losses of P307,600 in 2015 and 2014, amounted to P55,764 and P68,630 as of December 31, 2015 and 2014, respectively.

The recoverable amount was determined by an independent property appraiser having appropriate recognized professional qualifications and recent experience in the category of the property being valued. The fair value of the property being appraised was determined using the replacement cost model. This approach considers the cost to reproduce or replace in new condition the assets appraised in accordance with current market prices of materials, labor, contractor's overhead, profit and fees, and all other attendant's costs associated with its acquisition and installation in place. Adjustment is then made for accrued depreciation as evidenced by the observed condition and present and prospective serviceability in comparison with the new similar units.

The fair value of the distillation equipment has been categorized as Level 3 in the fair value hierarchy based on the inputs used in the valuation techniques.

In 2015, the Group sold certain properties located in Calumpit, Bulacan and Tagoloan, Misamis Oriental for P139,658. The Group recognized a gain amounting to P125,531, included as part of "Gain on sale of property and equipment" account in the 2015 consolidated statements of income.

Depreciation, amortization and impairment losses recognized in the consolidated statements of income amounted to P567,609, P616,065 and P662,810 in 2015, 2014 and 2013, respectively. These amounts include annual amortization of capitalized interest amounting to P12,072, P11,841 and P11,637 in 2015, 2014 and 2013, respectively.

Interest amounting to P2,471, P2,310 and P2,042 were capitalized to machinery and equipment in 2015, 2014 and 2013, respectively (Note 25). The capitalization rates used to determine the amount of interest eligible for capitalization were 4.35%, 4.88% and 5.69% in 2015, 2014 and 2013, respectively. The unamortized capitalized borrowing costs amounted to P53,636 and P63,237 as of December 31, 2015 and 2014, respectively.

13. Goodwill

In 2012, GSMI acquired 100% of the outstanding capital stock of EPSBPI for P200,000. EPSBPI, which is considered a CGU, is a company primarily engaged in the manufacturing and bottling of alcoholic beverages and NAB. The acquisition resulted in the recognition of goodwill amounting to P226,863.

The recoverable amount of goodwill has been determined based on a valuation using cash flow projections covering a five-year period based on long range plans approved by management. Cash flows beyond the five-year period are extrapolated using a constant growth rate determined per individual cash-generating unit. This growth rate is consistent with the long-term average growth rate for the industry. The discount rates applied to after tax cash flow projections ranged from 9% to 12% in 2015 and 2014. The discount rate also imputes the risk of the cash-generating units compared to the respective risk of the overall market and equity risk premium. As a result of decline in operations resulting in lower sales forecast compared with previous years, the Group recognized impairment loss amounting to P100,000 in 2015 (Note 26). The recoverable amount of goodwill has been categorized as Level 3 in the fair value hierarchy based on the inputs used in the valuation technique (Note 4).

The calculations of value in use are most sensitive to the following assumptions:

- *Gross Margins.* Gross margins are based on average values achieved in the period immediately before the budget period. These are increases over the budget period for anticipated efficiency improvements. Values assigned to key assumptions reflect past experience, except for efficiency improvement.
- *Discount Rates.* The Group uses the weighted-average cost of capital as the discount rate, which reflects management's estimate of the risk specific to each unit. This is the benchmark used by management to assess operating performance and to evaluate future investments proposals.
- *Raw Material Price Inflation.* Consumer price forecast is obtained from indices during the budget period from which raw materials are purchased. Values assigned to key assumptions are consistent with external sources of information.

14. Other Noncurrent Assets

Other noncurrent assets consist of:

	<i>Note</i>	2015	2014
Deferred containers - net		P288,117	P334,575

Noncurrent receivables and deposits - net include: (i) trade receivable referred to legal and receivables from terminated dealers amounting to P33,594 and P35,358 as of December 31, 2015 and 2014, respectively, net of allowance for impairment losses amounting to P96,807 and P65,930 as of December 31, 2015 and 2014, respectively. Provision for impairment losses amounted to P31,169 and nil in 2015 and 2014, respectively (Note 22). The Group has written-off receivables amounting to P292 in 2015; and (ii) security deposits to related parties amounting to P485 as of December 31, 2015 and 2014 (Note 27).

The movements in intangible assets are as follows:

	2015	2014

Amortization expense, included as part of “General and administrative expenses” account in the consolidated statements of income, amounted to P7,293 and P1,266 in 2015 and 2014, respectively (Note 22).

Others include: (i) input taxes on the acquisition of capitalizable assets amounting to P4,972 and P33,240 as of December 31, 2015 and 2014, respectively; and (ii) advances for a project that is temporarily put on hold amounting to P264,146 as of December 31, 2015 and 2014, respectively.

15. Notes Payable

This account consists of unsecured short-term peso-denominated borrowings obtained from local banks for working capital requirements. These loans mature in three months or less and bear annual interest rates ranging from 2% to 4.75% and 3% to 5.75% in 2015 and 2014, respectively.

Interest expense and other financing charges recognized in the consolidated statements of income amounted to P471,423, P495,963 and P556,641 in 2015, 2014 and 2013, respectively (Note 25).

The Group’s exposure to interest rate and liquidity risks are discussed in Note 32.

16. Trade and Other Payables

Trade and other payables consist of:

	<i>Note</i>	2015	2014
Floating interest rate based on PDST-F plus margin or BSP overnight rate, whichever is higher, with maturities up to 2018		P342,857	P457,143
Less current maturities		114,286	114,286
	32, 33	P228,571	P342,857

GSMI, through EPSBPI, has an unsecured, long-term interest bearing loan with a local bank amounting to P800,000. The proceeds of the loan was used to finance the construction of the bottling facilities in Ligao, Albay and Cauayan, Isabela.

The loan is payable up to nine years from and after the initial date of borrowing, but in no case later than September 30, 2018 (expiry date of memorandum of agreement), inclusive of a grace period of two years on principal repayment. The loan is payable in equal quarterly installments on the Principal Repayment Dates which commenced on February 18, 2012.

EPSBPI agrees to pay interest on the outstanding principal amount of borrowings on each interest payment date ending per annum equivalent to the higher of benchmark rate plus a spread of one percent or the overnight rate. Benchmark rate is the three-month PDST-F rate as displayed in the Philippine Dealing and Exchange Corporation page on the first day of each interest period. While overnight rate means the Bangko Sentral ng Pilipinas overnight reverse repo rate on interest rate settling date.

The movement in debt issue costs is as follows:

	2014
Balance at beginning of year	P2,166
Amortization	(2,166)
Balance at end of year	P -

Interest expense on long-term borrowings amounted to P17,207, P66,660 and P103,300 in 2015, 2014 and 2013, respectively.

Repayment Schedule

The annual maturities are as follows:

Year	Gross Amount
2016	P114,286
2017	114,286
2018	114,285
	P342,857

Contractual terms of the Group's interest-bearing loans and exposure to interest rate and liquidity risks are discussed in Note 32.

18. Income Taxes

Deferred tax assets arise from the following:

	2015	2014
Items recognized in profit or loss		
NOLCO	P157,639	P673,367
MCIT	165,094	78,458

Various accruals	17,788	85,594
Unrealized foreign exchange loss (gain) - net	625	(833)
Derivative liabilities (assets) - net	(90)	93
Net defined benefit retirement obligation (surplus)	(4,589)	7,486
Unamortized capitalized borrowing costs	(16,090)	(18,971)
	697,348	1,057,864
Items recognized directly in other comprehensive income		
Equity reserve for retirement plan	112,957	58,146
	P810,305	P1,116,010

The movements of the net deferred tax assets are accounted for as follows:

	2015	2014
Amount charged to profit or loss	(P360,516)	(P415,653)
Amount charged to other comprehensive income	54,811	20,987
	(P305,705)	(P394,666)

As of December 31, 2015, the NOLCO and MCIT of the Group that can be claimed as deduction from future taxable income and deduction from corporate income tax due, respectively, are as follows:

Year Incurred/Paid	Carryforward Benefits Up To	NOLCO	MCIT
2013	December 31, 2016	P1,508,367	P57,903
2014	December 31, 2017	18,085	78,128
2015	December 31, 2018	9,926	88,227
		P1,536,378	P224,258

As of December 31, 2015, deferred tax asset has not been recognized in respect of NOLCO and MCIT amounting to P1,010,915 and P59,164, respectively, as management believes it is not probable that future taxable income will be available against which the Group can utilize the benefit therefrom.

The components of income tax expense (benefit) from continuing operations are shown below:

	2015	2014	2013
Current	P149,380	P105,102	P109,999
Deferred	360,516	472,953	(462,646)
	P509,896	P578,055	(P352,647)

The income tax expense from continuing operations exclude the Group's share of the income tax benefit from the discontinued operation of P9,226, P57,299 and P51,497 in 2015, 2014 and 2013, respectively, which have been included in loss from discontinued operation, net of tax (Note 6).

The reconciliation between the statutory income tax rate on income before income tax and the Group's effective income tax rate is as follows:

	2015	2014	2013
Statutory income tax rate	30.00%	30.00%	30.00%
Increase (decrease) in income tax rate resulting from:			
Interest income subject to final tax	(0.82%)	(0.12%)	(0.10%)
Others	320.48%	(1,091.45%)	(3.46%)
Effective income tax rate	349.66%	(1,061.57%)	26.44%

The Group's annual contribution to the Retirement Plans consists of payments covering the current service cost plus amortization of unfunded past service liability.

Retirement costs recognized in the consolidated statements of income by GSMI amounted to P52,143, P56,697 and P63,010 in 2015, 2014 and 2013, respectively, while those charged by DBI amounted to P4,683, P4,381 and P3,436 in 2015, 2014 and 2013, respectively.

The retirement costs are recognized in the following line items:

	<i>Note</i>	2015	2014	2013
Cost of sales	20	P8,048	P8,173	P17,039
Selling and marketing expenses	21	10,987	12,494	13,462
General and administrative expenses	22	37,791	40,411	35,945
		P56,826	P61,078	P66,446

Retirement liabilities recognized by GSMI amounted to P342,617 and P203,533 as of December 31, 2015 and 2014, respectively, while those recognized by DBI amounted to P18,612 and P15,243 as of December 31, 2015 and 2014, respectively.

The carrying amounts of the Group's retirement plan approximate fair values as of December 31, 2015 and 2014.

The Group's plan assets consist of the following:

	In Percentages	
	2015	2014
Fixed income portfolio	42	38
Marketable securities	28	29
Stock trading portfolio	26	30
Others	4	3
	100	100

Investments in Marketable Securities

The plan assets include 11,443,321 and 9,943,321 common shares of the Company with fair market value per share of P12.28 and P15.88 as of December 31, 2015 and 2014, respectively.

The fair market value per share of the above marketable securities is determined based on quoted market prices in active markets as of the reporting date (Note 4).

The Group's Retirement Plans recognized losses on the investment in marketable securities of SMC and its subsidiaries amounting to P36,180 and P70,796 in 2015 and 2014, respectively.

There was no dividend income recognized in 2015 and 2014.

Investments in Pooled Funds

Investments in pooled funds were established mainly to put together a portion of the funds of the Retirement Plans of the Group to be able to draw, negotiate and obtain the best terms and financial deals for the investments resulting from big volume transactions.

The Board of Trustees approved the percentage of asset to be allocated to fixed income instruments and equities. The Retirement Plans have set maximum exposure limits for each type of permissible investments in marketable securities and deposit instruments. The Board of Trustees may, from time to time, in the exercise of its reasonable discretion and taking into account existing investment opportunities, review and revise such allocation and limits.

Approximately 6.63% and 7.93% of the Retirement Plans investments in pooled funds in stock trading portfolio include investments in shares of stock of SMC and its subsidiaries as of December 31, 2015 and 2014, respectively.

Approximately 10.84% and 10.06% of the Retirement Plans investments in pooled funds in fixed income portfolio include investments in shares of stock of SMC and its subsidiaries as of December 31, 2015 and 2014, respectively.

Others

Others include the Retirement Plans' cash and cash equivalents and receivables which earn interest.

The Retirement Plans Trustee has no specific matching strategy between the plan assets and the plan liabilities.

The Group is not required to pre-fund the future defined benefits payable under the Retirement Plans before they become due. For this reason, the amount and timing of contributions to the Retirement Plans are at the Group's discretion. However, in the event a benefit claim arises and the Retirement Plans are insufficient to pay the claim, the shortfall will then be due and payable from the Group to the Retirement Plans. The Group is not expected to contribute to its defined benefit retirement plan in 2016.

The Retirement Plans expose the Group to actuarial risks such as investment risk, interest rate risk, longevity risk and salary risk as follows:

Investment and Interest Rate Risks. The present value of the defined benefit retirement obligation is calculated using a discount rate determined by reference to market yields to government bonds. Generally, a decrease in the interest rate of a reference government bond will increase the defined benefit retirement obligation. However, this will be partially offset by an increase in the return on the Retirement Plan's investments and if the return on plan asset falls below this rate, it will create a deficit in the Retirement Plans. Due to the long-term nature of the defined benefit retirement obligation, a level of continuing equity investments is an appropriate element of the long-term strategy of the Group to manage the Retirement Plans efficiently.

Longevity and Salary Risks. The present value of the defined benefit retirement obligation is calculated by reference to the best estimates of: (1) the mortality of the plan participants, and (2) to the future salaries of the plan participants. Consequently, increases in the life expectancy and salary of the plan participants will result in an increase in the defined benefit retirement obligation.

The overall expected rate of return is determined based on historical performance of the investments.

The principal actuarial assumptions used to determine retirement benefits are as follows:

	In Percentages	
	2015	2014
Discount rate	4.54 - 5.24	4.31 - 4.80
Salary increase rate	7	7

Assumptions for mortality and disability rates are based on published statistics and mortality and disability tables.

The weighted average duration of defined benefit retirement obligation is 2.25 years and 2.4 years as of December 31, 2015 and 2014, respectively.

As of December 31, 2015 and 2014, the reasonable possible changes to one of the relevant actuarial assumptions, while holding all other assumptions constant, would have affected the defined benefit retirement obligation by the amounts below, respectively:

Defined Benefit Retirement Obligation Increase (Decrease)				
	2015		2014	
	1 Percent Increase	1 Percent Decrease	1 Percent Increase	1 Percent Decrease
Discount rate	(P9,026)	P9,750	(P9,949)	P10,775
Salary increase rate	8,187	(7,760)	9,064	(8,574)

In 2015 and 2014, the Group's transaction relating to the Retirement Plans pertain to the contributions for the period. There are no other transaction or outstanding receivables and payables with the plan assets.

30. Basic and Diluted Loss Per Share

Basic and Diluted Loss Per Share is computed as follows:

31. Share-Based Transactions

ESPP

Under the ESPP, 3,000,000 shares (inclusive of stock dividends declared) of the Company's unissued shares have been reserved for the employees of the Company. All permanent Philippine-based employees of the Company, who have been employed for a continuous period of one year prior to the subscription period, will be allowed to subscribe at 15% discount to the market price equal to the weighted average of the daily closing prices for three months prior to the offer period. A participating employee may acquire at least 100 shares of stock through payroll deductions.

The ESPP requires the subscribed shares and stock dividends accruing thereto to be pledged to the Company until the subscription is fully paid. The right to subscribe under the ESPP cannot be assigned or transferred. A participant may sell his shares after the second year from the exercise date.

Subscriptions receivable amounted to P335 and P4,975 as of December 31, 2015 and 2014 respectively, presented as part of "Trade and other receivables" account in the consolidated statements of financial position (Note 8).

The ESPP also allows subsequent withdrawal and cancellation of participants' subscriptions under certain terms and conditions. The shares pertaining to withdrawn or cancelled subscriptions shall remain issued shares and shall revert to the pool of shares available under the ESPP.

There were no shares offered under the ESPP in 2015 and 2014.

32. Financial Risk and Capital Management Objectives and Policies

Objectives and Policies

The Group has significant exposure to the following financial risks primarily from its use of financial instruments:

- Interest Rate Risk
- Foreign Currency Risk
- Commodity Price Risk
- Liquidity Risk
- Credit Risk

This note presents information about the exposure to each of the foregoing risks, the objectives, policies and processes for measuring and managing these risks, and for management of capital.

The principal non-trade related financial instruments of the Group include cash and cash equivalents, short-term and long-term loans and derivative instruments. These financial instruments, except derivative instruments, are used mainly for working capital management purposes. The trade-related financial assets and financial liabilities of the Group such as trade and other receivables, noncurrent receivables and deposits and trade and other payables arise directly from and are used to facilitate its daily operations.

The accounting policies in relation to derivatives are set out in Note 3 to the consolidated financial statements.

The BOD has the overall responsibility for the establishment and oversight of the risk management framework of the Group. The BOD has established the Risk Management Committee, which is responsible for developing and monitoring the risk management policies. The committee reports regularly to the BOD on its activities.

The risk management policies of the Group are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The BOD constituted the Audit Committee to assist the BOD in fulfilling its oversight responsibility of the Group's corporate governance process relating to the: a) quality and integrity of the financial statements and financial reporting process and the systems of internal accounting and financial controls; b) performance of the internal auditors; c) annual independent audit of the financial statements, the engagement of the independent auditors and the evaluation of the independent auditors' qualifications, independence and performance; d) compliance with legal and regulatory requirements, including the disclosure control and procedures; e) evaluation of management's process to assess and manage the enterprise risk issues; and f) fulfillment of the other responsibilities set out by the BOD. The Audit Committee shall also prepare the reports required to be included in the annual report of the Group.

The Audit Committee also oversees how management monitors compliance with the risk management policies and procedures of the Group and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

Interest Rate Risk

Interest rate risk is the risk that future cash flows from a financial instrument (cash flow interest rate risk) or its fair value (fair value interest rate risk) will fluctuate because of changes in market interest rates. The Group's exposure to changes in interest rates relates primarily to the long-term borrowings. Borrowings issued at fixed rates expose the Group to fair value interest rate risk. On the other hand, borrowings issued at variable rates expose the Group to cash flow interest rate risk.

The Group manages its interest cost by using an optimal combination of fixed and variable rate debt instruments. Management is responsible for monitoring the prevailing market-based interest rate and ensures that the mark-up rates charged on its borrowings are optimal and benchmarked against the rates charged by other creditor banks.

In managing interest rate risk, the Group aims to reduce the impact of short-term fluctuations on the earnings. Over the longer term, however, permanent changes in interest rates would have an impact on profit or loss.

The management of interest rate risk is also supplemented by monitoring the sensitivity of the Group's financial instruments to various standard and non-standard interest rate scenarios.

The sensitivity to a reasonably possible 1% increase in the interest rates, with all other variables held constant, would have decreased the Group's profit before tax (through the impact on floating rate borrowings) by P4,343, P5,221 and P6,380 in 2015, 2014 and 2013, respectively. A 1% decrease in the interest rate would have had the equal but opposite effect. These changes are considered to be reasonably possible given the observation of prevailing market conditions in those periods. There is no impact on the Group's other comprehensive income.

Interest Rate Risk Table

The terms and maturity profile of the interest-bearing financial instruments, together with its gross amounts, are shown in the following tables:

December 31, 2015	<1 Year	1 - 2 Years	>2 - 3 Years	>3 - 4 Years	>4 - 5 Years	Total

Foreign Currency Risk

The functional currency is the Philippine peso, which is the denomination of the bulk of the Group's revenues. The exposure to foreign currency risk results from significant movements in foreign exchange rates that adversely affect the foreign currency-denominated transactions of the Group. The risk management objective with respect to foreign currency risk is to reduce or eliminate earnings volatility and any adverse impact on equity.

Information on the Group's foreign currency-denominated monetary assets and their Philippine peso equivalents is as follows:

	December 31, 2015		December 31, 2014	
	US Dollar	Peso Equivalent	US Dollar	Peso Equivalent
Assets				
Cash and cash equivalents	US\$193	P9,102	US\$2,440	P109,137
Trade and other receivables	187	8,814	580	25,954
Foreign currency-denominated monetary assets	US\$380	P17,916	US\$3,020	P135,091

The Group reported net loss (gains) on foreign exchange from continuing and discontinued operations amounting to P2,081, (P2,778) and (P7,980) in 2015, 2014 and 2013, respectively, with the translation of its foreign currency-denominated assets (Notes 6 and 26). These mainly resulted from the movements of the Philippine peso against the US dollar as shown in the following table:

	US Dollar to Philippine Peso
December 31, 2015	47.060
December 31, 2014	44.720
December 31, 2013	44.395

The management of foreign currency risk is also supplemented by monitoring the sensitivity of the Group's financial instruments to various foreign currency exchange rate scenarios.

The following table demonstrates the sensitivity to a reasonably possible change in the US dollar exchange rate, with all other variables held constant, of the Group's profit before tax (due to changes in the fair value of monetary assets) and the Group's equity:

	P1 Decrease in the US Dollar Exchange Rate		P1 Increase in the US Dollar Exchange Rate	
	Effect on Income before Income Tax	Effect on Equity	Effect on Income before Income Tax	Effect on Equity
December 31, 2015				
Cash and cash equivalents	(P193)	(P135)	P193	P135
Trade and other receivables	(187)	(131)	187	131
	(P380)	(P266)	P380	P266

	P1 Decrease in the US Dollar Exchange Rate		P1 Increase in the US Dollar Exchange Rate	
	Effect on Income before Income Tax	Effect on Equity	Effect on Income before Income Tax	Effect on Equity
December 31, 2014				
Cash and cash equivalents	(P2,440)	(P1,708)	P2,440	P1,708
Trade and other receivables	(580)	(406)	580	406
	(P3,020)	(P2,114)	P3,020	P2,114

Exposures to foreign exchange rates vary during the year depending on the volume of overseas transactions. Nonetheless, the analysis above is considered to be representative of the Group's foreign currency risk.

Commodity Price Risk

Commodity price risk is the risk that future cash flows from a financial instrument will fluctuate because of changes in commodity prices. The Group, through SMC, enters into various commodity derivatives to manage its price risks on strategic commodities. Commodity hedging allows stability in prices, thus offsetting the risk of volatile market fluctuations. Through hedging, prices of commodities are fixed at levels acceptable to the Group, thus protecting raw material cost and preserving margins. For hedging transactions, if prices go down, hedge positions may show marked-to-market losses; however, any loss in the marked-to-market position is offset by the resulting lower physical raw material cost.

SMC enters into commodity derivative transactions on behalf of the Group to reduce cost by optimizing purchasing synergies within the SMC Group and managing inventory levels of common materials.

Commodity Forwards. The Group enters into forward purchases of various commodities. The prices of the commodity forwards are fixed either through direct agreement with suppliers or by reference to a relevant commodity price index.

Liquidity Risk

Liquidity risk pertains to the risk that the Group will encounter difficulty to meet payment obligations when they fall under normal and stress circumstances.

The Group's objectives to manage its liquidity risk are as follows: a) to ensure that adequate funding is available at all times; b) to meet commitments as they arise without incurring unnecessary costs; c) to be able to access funding when needed at the least possible cost; and d) to maintain an adequate time spread of refinancing maturities.

The Group constantly monitors and manages its liquidity position, liquidity gaps and surplus on a daily basis. A committed stand-by credit facility from several local banks is also available to ensure availability of funds when necessary.

The table below summarizes the maturity profile of the Group's financial assets and financial liabilities based on contractual undiscounted receipts and payments used for liquidity management.

Credit Risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from trade and other receivables. The Group manages its credit risk mainly through the application of transaction limits and close risk monitoring. It is the Group's policy to enter into transactions with a wide diversity of creditworthy counterparties to mitigate any significant concentration of credit risk.

The Group has regular internal control reviews to monitor the granting of credit and management of credit exposures.

Trade and Other Receivables

The exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the demographics of the Group's customer base, including the default risk of the industry and country in which customers operate, as these factors may have an influence on the credit risk.

Goods are subject to retention of title clauses so that in the event of default, the Group would have a secured claim. Where appropriate, the Group obtains collateral or arranges master netting agreements.

The Group has established a credit policy under which each new customer is analyzed individually for creditworthiness before the standard payment and delivery terms and conditions are offered. The Group ensures that sales on account are made to customers with appropriate credit history. The Group has detailed credit criteria and several layers of credit approval requirements before engaging a particular customer or counterparty. The review includes external ratings, when available, and in some cases bank references. Purchase limits are established for each customer and are reviewed on a regular basis. Customers that fail to meet the benchmark creditworthiness may transact with the Group only on a prepayment basis.

The Group establishes an allowance for impairment losses that represents its estimate of incurred losses in respect of trade and other receivables. The main components of this allowance include a specific loss component that relates to individually significant exposures, and a collective loss component established for groups of similar assets in respect of losses that have been incurred but not yet identified. The collective loss allowance is determined based on historical data of payment statistics for similar financial assets.

Financial information on the Group's maximum exposure to credit risk, without considering the effects of collaterals and other risk mitigation techniques, is presented below.

	<i>Note</i>	2015	2014
Cash and cash equivalents	7	P445,801	P579,917
Trade and other receivables - net	8	2,802,212	3,921,468
Derivative assets	10	430	52
Noncurrent receivables and deposits	14	187,338	189,981
		P3,435,781	P4,691,418

The credit risk for cash and cash equivalents and derivative assets is considered negligible, since the counterparties are reputable entities with high quality external credit ratings.

The Group's exposure to credit risk arises from default of counterparty. Generally, the maximum credit risk exposure of trade and other receivables and noncurrent receivables and deposits is its carrying amount without considering collaterals or credit enhancements, if any. The Group has no significant concentration of credit risk since the Group deals with a large number of homogenous counterparties. The Group does not execute any credit guarantee in favor of any counterparty.

Capital Management

The Group maintains a sound capital base to ensure its ability to continue as a going concern, thereby continue to provide returns to stockholders and benefits to other stakeholders and to maintain an optimal capital structure to reduce cost of capital.

The Group manages its capital structure and makes adjustments in the light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, pay-off existing debts, return capital to shareholders or issue new shares.

The Group defines capital as paid-in capital stock, additional paid-in capital and retained earnings, both appropriated and unappropriated. Other components of equity such as treasury stock, cumulative translation adjustments and reserve for retirement plan are excluded from capital for purposes of capital management.

The BOD has overall responsibility for monitoring capital in proportion to risk. Profiles for capital ratios are set in the light of changes in the external environment and the risks underlying the Group's business, operation and industry.

The Group monitors capital on the basis of debt-to-equity ratio, which is calculated as total debt divided by total equity. Total debt is defined as total current liabilities and total noncurrent liabilities, while equity is total equity as shown in the consolidated statements of financial position.

The Group is not subject to externally imposed capital requirements.

33. Financial Assets and Financial Liabilities

The table below presents a comparison by category of carrying amounts and fair values of the Group's financial instruments:

	December 31, 2015		December 31, 2014	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial Assets				
Cash and cash equivalents	P445,801	P445,801	P579,917	P579,917
Trade and other receivables - net	2,802,212	2,802,212	3,921,468	3,921,468
Derivative assets (included under "Prepaid expenses and other current assets" account)	430	430	52	52
Noncurrent receivables and deposits - net (included under "Other noncurrent assets - net" account)	187,338	187,338	189,981	189,981
Financial Liabilities				
Notes payable	8,406,460	8,406,460	10,084,440	10,084,440
Trade and other payables (excluding dividends payable and derivative liabilities)	2,230,667	2,230,667	2,323,555	2,323,555
Derivative liabilities (included under "Trade and other payables" account)	128	128	360	360
Long-term debt (including current maturities)	342,857	342,857	457,143	457,143

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

Cash and Cash Equivalents, Trade and Other Receivables and Noncurrent Receivables and Deposits. The carrying amount of cash and cash equivalents and trade and other receivables approximates fair value primarily due to the relatively short-term maturities of these financial instruments. In the case of noncurrent receivables and deposits, the fair value is based on the present value of expected future cash flows using the applicable discount rates based on current market rates of identical or similar quoted instruments.

Derivatives. The fair values of forward exchange contracts are calculated by reference to current forward exchange rates. Fair values for embedded derivatives are based on valuation models used for similar instruments using both observable and non-observable inputs.

Notes Payable and Trade and Other Payables. The carrying amount of notes payable and trade and other payables approximates fair value due to the relatively short-term maturities of these financial instruments.

Long-term Debt. The fair value of interest-bearing fixed-rate loans is based on the discounted value of expected future cash flows using the applicable market rates for similar types of instruments as of reporting date. Discount rates used for Philippine peso-denominated loans range from 2.4% to 4.6% and 2.5% to 4.3% as of December 31, 2015 and 2014, respectively. The carrying amounts of floating rate loans with quarterly interest rate repricing approximate their fair values.

Derivative Financial Instruments

The Group's derivative financial instruments according to the type of financial risk being managed and the details of embedded derivative financial instruments are discussed below.

Derivative Instruments not Designated as Hedges

The Group enters into certain derivatives as economic hedges of certain underlying exposures. These include embedded derivatives found in host contracts, which are not designated as accounting hedges. Changes in fair value of these instruments are accounted for directly in the consolidated statements of income. Details are as follows:

Embedded Currency Forwards

The total outstanding notional amount of currency forwards embedded in non-financial contracts amounted to US\$4,658 and US\$828 as of December 31, 2015 and 2014, respectively. These non-financial contracts consist mainly of foreign currency denominated purchase orders and sales agreements. The embedded forwards are not clearly and closely related to their respective host contracts. The net fair value of these embedded currency forwards amounted to P302 and (P308) as of December 31, 2015 and 2014, respectively.

The Group recognized marked-to-market gains (losses) from embedded derivatives amounting to (P702), (P2,459) and P1,007 in 2015, 2014 and 2013, respectively (Note 26).

Fair Value Changes on Derivatives

The net movements in fair value of all derivative instruments are as follows:

	2015	2014
Balance at beginning of year	(P308)	(P259)
Net changes in fair value of non-accounting hedges	(702)	(2,459)
	(1,010)	(2,718)
Less fair value of settled instruments	(1,312)	(2,410)
Balance at end of year	P302	(P308)

Fair Value Hierarchy

Financial assets and financial liabilities measured at fair value in the consolidated statements of financial position are categorized in accordance with the fair value hierarchy. This hierarchy groups financial assets and financial liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and financial liabilities (Note 3).

The table below analyzes financial instruments carried at fair value, by valuation method:

	December 31, 2015			December 31, 2014		
	Level 1	Level 2	Total	Level 1	Level 2	Total
Financial Assets						
Derivative assets	P -	P430	P430	P -	P52	P52
Financial Liabilities						
Derivative liabilities	-	128	128	-	360	360

The Group has no financial instruments valued based on Level 1 and Level 3 as of December 31, 2015 and 2014. During the year, there were no transfers between Level 1 and Level 2 fair value measurements, and no transfers into and out of Level 3 fair value measurements.

34. Other Matters

a. *Commitments*

- The Company has a Toll Manufacturing Agreement with third parties for the production of its alcoholic and nonalcoholic products. Toll manufacturing expense amounting to P82,677, P245,368 and P286,962 in 2015, 2014 and 2013, respectively, were included as part of “Outside services” account under the “Cost of sales” account (Note 20).
- The outstanding purchase commitments of the Company amounted to US\$105,225 (P4,951,885) and US\$19,837 (P887,113) as of December 31, 2015 and 2014, respectively.

b. *Contingencies*

The Group is a party to certain lawsuits or claims (mostly labor related cases) filed by third parties which are either pending decision by the courts or are subject to settlement agreements. The outcome of these lawsuits or claims cannot be presently determined. In the opinion of management and its legal counsel, the eventual liability from these lawsuits or claims, if any, will not have a material effect on the consolidated financial statements of the Group. No provision was recognized in 2015, 2014 and 2013.

- #### c.
- Certain accounts in prior years have been reclassified for consistency with the current period presentation. These reclassifications have no effect on the reported financial performance for any period.

GINEBRA SAN MIGUEL INC. AND SUBSIDIARIES

FINANCIAL SOUNDNESS INDICATORS

The following are the major performance measures that Ginebra San Miguel Inc. and Subsidiaries (the Group) uses. Analyses are employed by comparisons and measurements based on the financial data as of December 31, 2015 and 2014 for liquidity, solvency and profitability ratios and for the periods ending December 31, 2015 and 2014 for operating efficiency ratios.

	December 31	
	2015	2014
Liquidity:		
Current Ratio	0.72	0.72
Solvency:		
Debt to Equity Ratio	2.84	2.89
Asset to Equity Ratio	3.84	3.89
Profitability:		
Return on Average Equity	(9%)	(15%)
Interest Rate Coverage Ratio	2.61	1.80
Operating Efficiency:		
Volume Growth	4%	4%
Revenue Growth	11%	9%
Operating Margin	4%	2%

The manner by which the Group calculates the key performance indicators is as follows:

KPI	Formula

GINEBRA SAN MIGUEL INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL POSITION AND PERFORMANCE

The following discussion should be read in conjunction with the attached audited consolidated financial statements of Ginebra San Miguel Inc. (the Parent Company or GSMI) and its subsidiaries (collectively referred to as the Group) as of and for the period ended December 31, 2015 (with comparative figures as of December 31, 2014 and for the period ended December 31, 2013). All necessary adjustments to present fairly the consolidated financial position, financial performance and cash flows of the Group as of December 31, 2015, and for all the other periods presented, have been made. Certain information and footnote disclosure normally included in the audited consolidated financial statements prepared in accordance with Philippine Financial Reporting Standards have been omitted.

I. FINANCIAL PERFORMANCE

2015 vs. 2014

With the price increase for liquor products implemented in January and volume growing faster in the second half of the year, revenues ended 11% higher versus 2014. As a result, total gross profit jumped 10% from a year ago despite an increase in cost of sales.

The more aggressive advertising and promotion programs drove selling and marketing expenses to increase by 5% compared last year. Likewise, the general and administrative expenses rose 14% mainly due to increase in personnel, provision for impairment losses and repairs and maintenance.

Meanwhile, interest expense net of interest income declined by 18% from 2014 because of the significant reduction in notes payable and continuous settlement of long-term obligations.

Equity in net losses of joint ventures increased against last year because of the allowance for impairment loss recognized. This was due to the decline in operations resulting in lower sales forecast compared with previous years.

In addition, the sale of scraps and certain properties resulted to Php 75 million other income net of the goodwill impairment loss related to EPSBPI.

All these translated to an income before tax of Php 146 million, a substantial improvement from previous year's loss before tax of Php 55 million for the business with continuing operations. Combined with a lower provision for income tax on account of lower Net Operating Loss Carry Over (NOLCO) and loss before tax from the discontinued operation, net loss ended at Php 386 million. This was 50% better than last year's net loss of Php 766 million and 2013's net loss of Php 1.1 billion.

Anchored on the robust performance in 2015 and the better economic prospects of 2016, the Group is confident it can continue to move forward as it focuses in sustaining the growth of its core brands and will endeavor to strengthen traction of recently launched products. The marketing and distribution programs were crafted to be more relevant in order to ensure continued patronage and to promote interest across a younger and wider consumer base. Complemented by the pursuit for higher operational efficiency and purposive cost reduction measures, the Group is poised to deliver better results than this year.

2014 vs. 2013

Revenues grew 9% versus 2013 due to liquor volume growth and the impact of the price increase on liquor products.

Higher volumes of liquor, higher selling prices and lower production cost resulted in a 35% increase in gross profit over 2013.

Managed spending for advertising and promotion programs trimmed down selling and marketing expenses by 17%. While, general and administrative expenses grew 13% mainly due to increase in rent and taxes and licenses.

Early settlement of long-term debt resulted in a 20% decline in interest expense, net of interest income.

Lower equity in net losses of joint ventures by 11% was due to significant reduction in fixed costs of Thai San Miguel Liquor Co. Ltd. (TSML).

Other income (charges) - net was due to the inventory losses recognized this year, which exceeded other income.

Provision for income tax for 2014 relates to Minimum Corporate Income Tax (MCIT) increase due to increase in gross profit in 2014 and recognition of expired tax benefit from NOLCO in 2011 and 2012 versus 2013's tax benefit also from NOLCO.

Improvement in volumes, particularly of flagship brand Ginebra San Miguel, resulted from the implementation of sales and marketing programs and the thematic campaign “Ganado sa Buhay” launched in the first semester. Cost reduction and working capital management further reduced operating and financing expenses. All these resulted in a 30% drop in net loss versus last year.

Focus on core brands reaped gains for the year. The launch of consumer promos during the year boosted consumer interest and off-take. With the growth momentum achieved in 2014, the company is poised to sustain volume growth through more effective sales and marketing programs, management of costs and improvement in operating efficiencies towards obtaining better results in 2015.

On December 5, 2014, the Company's Board authorized the sale and transfer to San Miguel Brewery Inc. of certain non-alcoholic beverage assets consisting of property, plant and equipment as of December 31, 2014, and inventories as of March 31, 2015 (the “Transaction”) and delegated to Management the negotiation and conclusion of the terms and conditions of the Transaction.

II. FINANCIAL POSITION

2015 vs. 2014

The Company's cash position at the end of the year was lower by 23% largely due to more raw materials purchased and settlement of both short-term and long-term debts among others.

Meanwhile, the significant improvement in collection resulted in a 29% reduction in trade and other receivable despite higher sales revenue for the year. This was due to programs implemented and the year-long effort to manage the Company's receivables.

With the more purchases in 2015 as mentioned above, inventory value at the end of the period grew by 16%. This was largely on account of more expensive molasses and the purposive build-up of raw alcohol, bottles and bunker fuel as a strategy to manage the cost of key production materials.

The year-to-date net loss of TSML joint venture further declined by 20% because of the provision for impairment loss recognized at the end of the year. This was a result of the decline in operations resulting to lower sales forecast compared to previous years.

On the other hand, the deferred tax assets slipped by 27% as an effect of recognition of applied and expired 2012 NOLCO and MCIT.

Trade and other payables decreased by 4% on account of payments made from additional purchase of materials and supplies.

Annex “C”

Lastly, with the Company's improved performance in 2015, it was able to reduce its notes payable by almost Php 1.7 billion and concurrently settled its long-term obligation – net of current maturities by another 33% when compared against last year's debt level.

2014 vs. 2013

Improvement in operating results resulted to better cash position as cash and cash equivalents increased by 13%.

Higher collection in spite of an increase in revenue from customers resulted to a 4% reduction in trade and other receivables – net.

Inventories declined by 29% due to managed purchases of raw materials particularly alcohol in order to reduce working capital levels.

Net loss of joint venture, resulting from lower TSML sales volumes, resulted in 8% decline in investment in joint ventures.

Deferred tax assets declined by 26% due to recognition of expired 2011 and 2012 NOLCO and MCIT.

Advances extended to TSML in the first semester of the year led to a 6% increase in net other non-current assets.

Trade and other payables decreased by 9% due to managed purchases.

Income and other taxes payable was reduced by 6% on account of lower output tax partly offset by higher MCIT due to better operating results.

Long-term debt – net of current maturities reduced by 59%, due to early payment of Parent Company's long-term debt.
